Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions.

1. Before You Begin

What Is Included

- Maverick Storm 4 Profile
- Seetronic Powerkon IP65 power cable
- 2 Omega brackets with mounting hardware
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate the claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
Settings	A menu option not to be modified
<enter></enter>	A key to be pressed on the product's control panel

Symbols

Symbol	Meaning
<u></u>	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
(i)	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

Any reference to data or power connections in this manual assumes the use of Seetronic IP-rated cables.

The term "DMX" used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

- The luminaire is intended for professional use only.
- The luminaire should be positioned so that prolonged staring into the luminaire at a distance closer than 37.73 ft (11.5 m) is not expected.
- If the external flexible cable or cord of this luminaire is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or its service agent.
- The light source contained in this luminaire shall only be replaced by the manufacturer or its service agent or a similar qualified person.

CAUTION:

- This product's housing may be hot when operating. Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- When transferring the product from extreme temperature environments, (e.g., cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow the product to fully acclimate to the surrounding environment before connecting it to power.
- Flashing light is known to trigger epileptic seizures. User must comply with local laws regarding notification of strobe use.

ALWAYS:

- Disconnect from power before cleaning the product or replacing the fuse.
- When using an IP65-rated product in an outdoor environment, use IP65- (or higher) rated power and data cable.
- Replace and secure IP-rated protective covers to all power, data, USB, or other ports when not in use.
- Replace the fuse with the same type and rating.
- Use a safety cable when mounting this product overhead.
- Connect this product to a grounded and protected circuit.

DO NOT:

- Open this product. It contains no user-serviceable parts.
- Look at the light source when the product is on.
- Leave any flammable material within 20 cm of this product while operating or connected to power.
- Connect this product to a dimmer or rheostat.
- Operate this product if the housing, lenses, or cables appear damaged.
- Submerge this product (adhere to standards for the published IP rating). Regular outdoor operation is fine.
- Permanently install outdoors in locations with extreme environmental conditions. This includes, but is not limited to:
 - Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
 - Locations where normal temperatures exceed the temperature ranges in this manual.
 - Locations that are prone to flooding or being buried in snow.
 - Other areas where the product will be subject to extreme radiation or caustic substances.
- ONLY use the hanging/mounting bracket to carry this product.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate this product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- In the event of a serious operating problem, stop using immediately.

If a Chauvet product requires service, contact Chauvet Technical Support.

FCC Statement of Compliance

This device complies with Part 15 Part B of the FCC rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Warning for North America and Australia

Warning! This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and the user. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

2. Introduction

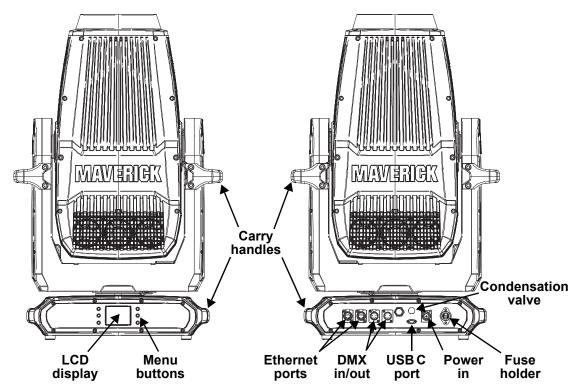

Description

Maverick Storm 4 Profile brings indomitable long throw performance to even the largest venues. Its ambitious design launches over 60,000 lumens across incredible distances with commanding brightness. Built to outshine, this Maverick brings more to a show than its long throw. Master the art of domination with a sophisticated variable CMY+CTO system that delivers fantastic color rendering. Double down on crisp gobos to create complex looks with two rotating gobo wheels, two prisms, two frost filters, and an animation wheel to add even more texture. Sharp shutter framing, smooth iris and 8.5:1 zoom complete a Maverick that delivers key light and high-energy kinetic effects, in an advanced IP65 alloy body that carries SunShield tech inside to protect optical components from any solar ingress through its audacious 188mm front lens.

Features

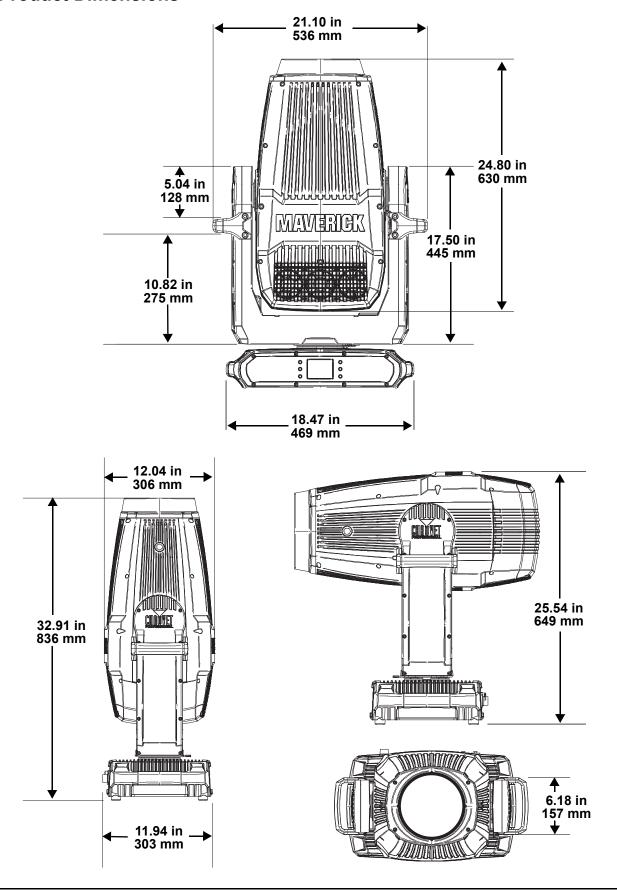

- Fully featured, compact, and lightweight IP65 1250 W LED yoke profile fixture, including CMY + CTO color mixing, a four-blade framing shutter system with rotation, a color wheel, 8:1 zoom, two prisms (five-facet round and linear), two rotating gobo wheels, and integrated sun shield
- 16-bit dimming of master dimmer for smooth control of fades
- Variable CMY + CTO color mixing system to create a wide pallet of colors
- CRI and CTB filters on color wheel for added flexibility
- Two rotating, indexing, and interchangeable slot and lock gobo wheels
- An animation wheel for kinetic textured effects
- DMX, WDMX, sACN, and Art-Net for full flexibility of control options
- RDM control over DMX for fixture reporting
- 5.6° to 56.8° zoom range for variable beam sizes
- · Iris, five-facet round and linear prisms, and two frosts (light and medium) for beam control
- TRUE1-compatible power input
- Integrated sun shield for protecting the optical path from sunlight when the fixture is off
- Three setup menu presets and preset sync for cross-loading to multiple like fixtures for easy shop setup
- USB slot for software uploads
- Battery backup display with auto-rotate depending on fixture orientation

Product Overview

Product Dimensions

3. Setup

AC Power

The Maverick Storm 4 Profile has an auto-ranging power supply, and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart. The listed current rating indicates the product's average current draw under normal conditions.

- Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure
 the product has an appropriate electrical ground to avoid the risk of electrocution or fire.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The Maverick Storm 4 Profile comes with a power input cable terminated with a Seetronic Powerkon A connector on one end and bare wire on the other end (U.S. market). Use the table below to wire a plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Fuse Replacement

- 1. Disconnect this product from the power outlet.
- 2. Using a flat-head screwdriver, unscrew the fuse holder cap from the housing.
- 3. Remove the blown fuse and replace with another fuse of the same type and rating (25 A, 500 V).
- 4. Screw the fuse holder cap back in place and reconnect power.

USB Software Update

The Maverick Storm 4 Profile allows for software updates with a USB device using the built-in USB port. To update the software using a USB flash drive, do the following:

- 1. Power on the product, and plug the flash drive into the USB port.
- 2. Once the flash drive has been detected, the message "USB UPDATE" will be displayed. Select YES.
- 3. The next screen will show the software versions available for this fixture on the USB drive. For multiple versions of the software for the same fixture, use **<UP>** or **<DOWN>** to select the desired version. Press **<ENTER>**.
- 4. The "USB UPDATE" screen will re-appear. Select YES.

It is possible to update multiple units with the USB if they are daisy chained via DMX.

- 5. The upgrade will start. **DO NOT** turn off the power or disconnect the USB while the USB LED is still blinking during the process. The screen display will read: "**USB Update Wait**". The update can take several minutes to complete.
 - When the USB firmware is done uploading, in some fixtures, the display will change to: "DO NOT UNPLUG, UPDATING".
- 6. When the update is completed, the fixture will automatically reboot.
- 7. Go to Fixture Information on the product's menu map and confirm the firmware revision.
- 8. When the boot-up process is finished, restart the product.

- Place the .chl file in the root directory of the USB drive.
- The product's USB port supports up to 32GB capacity and only works with FAT32 file format.

Turning off the power or removing the USB while the USB LED is still blinking during the update will cause partial or total firmware failure in the targeted fixture(s). If this occurs, the user will need the UPLOAD 08 device to fix this. Please contact Chauvet regarding this device.

Signal Connections

The Maverick Storm 4 Profile can receive a DMX, Art-Net™, or sACN signal. The product has two Amphenol XLRnet through ports, and 5-pin DMX in and out ports. It is possible to control compatible products individually with a single controller.

Control Personalities

The Maverick Storm 4 Profile uses a 5-pin DMX data connection, WDMX, Art-Net[™], or sACN for its two control personalities: **Dmx Mode 38 CH** and **Dmx Mode 55 CH**.

- Refer to the <u>Operation</u> chapter to learn how to configure the Maverick Storm 4 Profile to work in these personalities.
- The <u>Control Channel Assignments and Values</u> section provides detailed information regarding the control personalities.

For more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX primer from the Chauvet website: www.chauvetprofessional.com.

DMX Linking

Use a 5-pin DMX connection or a WMDX connection to link a DMX controller to the Maverick Storm 4 Profile. For more information about DMX, read the DMX primer at: https://www.chauvetprofessional.com/wp-content/uploads/2016/06/DMX Primer.pdf.

Remote Device Management

Remote Device Management (RDM) is a standard for allowing DMX-enabled devices to communicate bidirectionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer, as not all DMX controllers have this capability. The Maverick Storm 4 Profile supports RDM protocol that allows feedback to make changes to menu map options.

Art-Net™ Connection

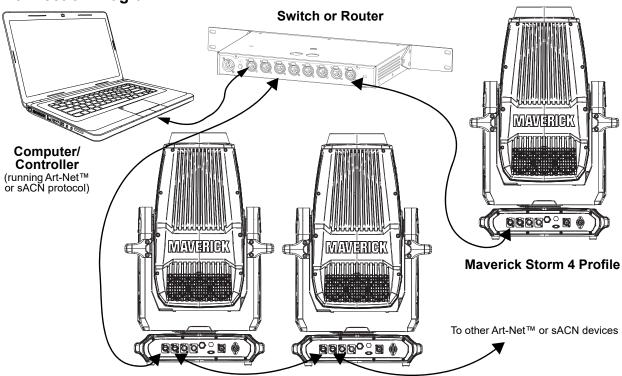

Art-Net[™] is an Ethernet protocol that uses TCP/IP that transfers a large amount of DMX512 data using an Amphenol XLRnet RJ45 connection over a large network. An Art-Net[™] protocol document is available from www.chauvetprofessional.com.

Art-Net™ designed by and copyright Artistic Licence Holdings Ltd.

sACN Connection

Streaming ACN (Architecture for Control Networks), also known as ANSI E1.31, is an Ethernet protocol that uses the layering and formatting of ACN to transport DMX512 data over IP or any other ACN-compatible network.

Connection Diagram

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the <u>Safety Notes</u>. For the Chauvet Professional line of mounting clamps, go to http://trusst.com/products/.

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

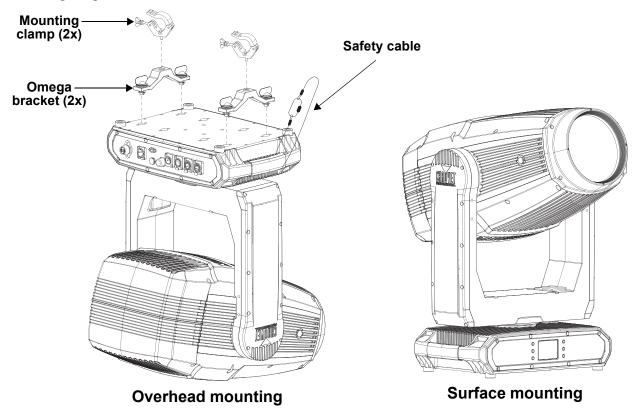

Chauvet recommends using the following general guidelines when mounting this product:

- Before deciding on a location for the product, always make sure there is easy access to the product for maintenance and programming.
- Make sure that the structure and attachment points can support the weight before hanging the product (see the <u>Technical Specifications</u>).
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power-linking cables to reach.

Procedure

The Maverick Storm 4 Profile comes with 2 Omega brackets. The user can directly attach mounting clamps (sold separately) to these omega brackets. Use at least two mounting points per product. Make sure the clamps are capable of supporting the weight of this product. For the Chauvet Professional line of mounting clamps, go to http://www.trusst.com/products.

Mounting Diagram

Use the 140-D Omega brackets that is supplied with the fixture when doing an overhead mount.

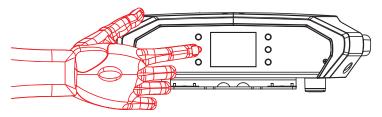

4. Operation

Control Panel Description

Button	Name	Function			
·	<up></up>	Navigates upwards through the menu list or increases the value when in a function			
<u> </u>	<menu></menu>	Exits from the current menu or function			
\triangle	<down></down>	Navigates downwards through the menu list or decreases the value when in a function			
\Diamond	<left></left>	*LEFT> Navigates leftwards through the menu list			
Ţ	<enter></enter>	Enables the currently displayed menu or sets the selected value into the function			
\Rightarrow	<right></right>	Navigates rightwards through the menu list			

Battery-Powered Display

The Maverick Storm 4 Profile has a battery-powered display that enables access to the menu when the product is powered off. Press and hold **<MENU>** until the display activates (approximately 15 seconds).

Home Screen

The Maverick Storm 4 Profile has a home screen that shows the current control protocols, personalities, starting addresses, IP addresses, and universes. To see the home screen, press **<MENU>** repeatedly until it shows on the display. From the home screen, touch any of the displayed control settings to immediately jump to that part of the menu, such as the personality, starting address, or universe, or press **<ENTER>** to reach the main menu.

Control Panel Lock

The setting locks or unlocks the control panel.

- 1. Go to the **Settings** main level.
- 2. Select the Lock Screen option.
- 3. Select NO (control panel stays unlocked) or YES (locks control panel).

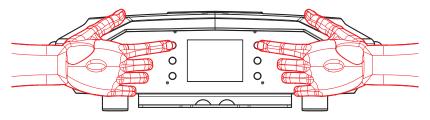

When the control panel lock is activated, the product will prompt for the passcode in order to access the menu. Enter the passcode as described below.

Passcode

After being prompted to enter the passcode, enter the numbers 0920.

Technician Mode

The technician mode disables the pan and tilt motors, allowing the output of the product to be aimed by hand. To enable the technician mode of the Maverick Storm 4 Profile, hold **<UP>** and **<LEFT>** while the product is powering on. When the product is turned off and back on, the pan and tilt will return to normal function.

Menu Map

Refer to the Maverick Storm 4 Profile product page on www.chauvetprofessional.com for the latest menu map.

Control Configuration

Use control configurations to operate the product with a DMX, Art-Net™, or sACN controller.

Control Mode

The Maverick Storm 4 Profile works with wired DMX, WDMX, Art-Net™, and sACN control signals. To select which protocol to use:

- 1. Go to the **Settings** main level.
- 2. Select the Control Mode option.
- 3. Select the desired protocol, from DMX, ArtNet, sACN, or WDMX.

Control Personalities

To set the control personality:

- 1. Go to the **Personality** main level.
- 2. Select the desired personality, from Dmx Mode 38 CH or Dmx Mode 55 CH.

- See the <u>Starting Address</u> section for the highest selectable starting address for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

Starting Address

Each product will respond to a unique starting address from the controller. All products with the same starting address will respond in unison. To set the starting address:

- Go to the Address main level.
- 2. Select the starting address (001–512).
 - The highest recommended starting address for Dmx Mode 38 CH is 475.
 - The highest recommended starting address for Dmx Mode 55 CH is 458.

Network Setup

The Network Setup settings control the IP address, subnet mask, and universe of the product.

IP Mode

To choose how the IP address is set:

- 1. Go to the **Network Setup** main level.
- 2. Select the IP Mode option.
- Select the desired IP mode, from Manual (to set a custom IP address), DHCP (the IP address is assigned by the connected network), or Static (the product uses a default, preset IP address).

Universe

To assign an Art-Net™ or sACN universe to the Maverick Storm 4 Profile:

- 1. Go to the **Network Setup** main level.
- 2. Select the Universe option.
- 3. Set the universe, from **000–255** (for Art-Net[™]) or from **001–256** (for sACN).

Manual IP Address

To set the IP address when the IP Mode is set to Manual:

- 1. Go to the **Network Setup** main level.
- 2. Select the **Ip** option.
- 3. Set the 4 values of the IP address from 000-255.

Subnet Mask

To set the subnet mask:

- 1. Go to the **Network Setup** main level.
- 2. Select the SubMask option.
- 3. Set the 4 values of the subnet mask from **000–255**.

Configuration Settings

Pan Reverse

To set the orientation of the pan:

- 1. Go to the **Settings** main level.
- 2. Select the Pan Reverse option.
- 3. Select from **NO** (normal pan motion), or **YES** (reversed pan motion).

Tilt Reverse

To set the orientation of the tilt:

- 1. Go to the **Settings** main level.
- Select the Tilt Reverse option.
- 3. Select from **NO** (normal tilt motion), or **YES** (reversed tilt motion).

Screen Reverse

To set the orientation of the display:

- 1. Go to the **Settings** main level.
- 2. Select the Screen Reverse option.
- 3. Select from NO (right-side up), YES (upside-down), or AUTO (automatic orientation).

Pan Angle

To set the maximum angle of the pan:

- 1. Go to the **Settings** main level.
- 2. Select the Pan Angle option.
- 3. Select from **540** (540°), **360** (360°), or **180** (180°).

Tilt Angle

To set the maximum angle of the tilt:

- 1. Go to the **Settings** main level.
- 2. Select the **Tilt Angle** option.
- 3. Select from **270** (260°), **180** (180°), or **090** (90°).

Black out on Movement

To set the product to black out while the pan/tilt, color wheel, or gobo wheels are moving:

- 1. Go to the **Settings** main level.
- 2. Select from the **BL. O. P/T Move** (black out on pan/tilt movement), **BL. O. ColorMove** (black out on color wheel movement), or **BL. O. GoboMove** (black out on gobo wheel movement) options.
- 3. Select from NO or YES.

Swap Pan and Tilt

To swap the controls for the pan and tilt:

- 1. Go to the **Settings** main level.
- Select the Swap XY option.
- 3. Select from NO (pan controls pan, tilt controls tilt) or YES (pan controls tilt, tilt controls pan).

WDMX Reset

To reset the WDMX connection:

- 1. Go to the **Settings** main level.
- 2. Select the WDMX Reset option.
- 3. Select from NO or YES.

Display Backlight Timer

To set how long before an inactive display will turn off:

- 1. Go to the **Settings** main level.
- 2. Select the **Backlight Timer** option.
- Select the length of the backlight timer, from 30S (30 seconds), 1M (1 minute), 5M (5 minutes), or ON (always on).

Loss of Data

To set how the product reacts to a loss of in control signal data:

- 1. Go to the **Settings** main level.
- 2. Select the Loss of Data option.
- 3. Select Hold (holds the last values received before signal loss) or Close (blacks out the product).

Fan Mode

To set the fan speed mode:

- 1. Go to the **Settings** main level.
- 2. Select the Fans option.
- 3. Select the fan mode, from **Auto** (fan speed adjusts to product temperature), **Full** (fan speed at maximum), **ECO** (quiet mode), **TV25** (maintains LED output up to an ambient temperature of 77 °F [25 °C]), or **TV35** (maintains LED output up to an ambient temperature of 95 °F [35 °C]).

When using the TV25 or TV35 fan mode, please set the PWM Options (<u>Pulse Width Modulation</u>) to 6000Hz or 15000Hz to prevent any harmonization noise.

Dimmer Curve

To set the dimmer curve:

- 1. Go to the **Settings** main level.
- 2. Select the **Dimmer Curve** option.
- 3. Select the dimmer curve, from Linear, Square, I Squa, SCurve, or Linear2.

Pulse Width Modulation

To adjust the frequency of the pulse width modulation:

- 1. Go to the **Settings** main level.
- 2. Select the **PWM Option** option.
- 3. Select the frequency, from 600Hz, 1200Hz, 2000Hz, 4000Hz, 6000Hz, or 15000Hz.

LED Power

To set the power of each LED color:

- 1. Go to the **Settings** main level.
- 2. Select the **LED POWER** option.
- 3. Set the LED power from **64–255**.

Minimum Zoom Focus

To enable or disable the Min Zoom Focus function:

- 1. Go to the **Settings** main level.
- 2. Select the **Min Zoom Focus** option.
- 3. Select NO (manual independent zoom control) or YES (focus adjusts depending on zoom setting).

Preset Selection

To select a preset configuration of menu options:

- 1. Go to the **Settings** main level.
- 2. Select the Preset Select option.
- 3. Select from PRESET A (default), PRESET B, or PRESET C.

- Changes to settings automatically save to the currently selected Preset.
- If no Preset has been selected, changes to settings save to PRESET A.
- After selecting a Preset, the product will restart.

Preset Synchronization

To transfer saved Presets from one Maverick Storm 4 Profile to another:

- 1. Connect the Maverick Storm 4 Profile products to receive the Presets by a DMX daisy chain.
- 2. Make the Maverick Storm 4 Profile with the Presets to transfer the first in the DMX daisy chain.
- 3. Power on all of the products.
- 4. Set all of the products to a Control Mode other than WDMX. (DMX, ArtNet, or sACN)
- 5. On the Maverick Storm 4 Profile with the Presets, go to the **Settings** main level.
- 6. Select the **Preset Sync** option.
- 7. Select NO (to cancel) or YES (to transfer the Presets to the connected products).

- All menu configurations are transferred except for the IP address.
- ONLY connect Maverick Storm 4 Profile products for this function!

USB Update

To enable or disable software update using USB:

- 1. Go to the **Settings** main level.
- 2. Select the **USB Update** option.
- Select NO (disables software update through USB) or YES (enables software update through USB).

See the <u>USB Software Update</u> section for the detailed instructions on how to update the Maverick Storm 4 Profile software using a USB C connection.

Reset Function

To reset specific functions or the entire product:

- 1. Go to the **Settings** main level.
- 2. Select the **Reset Function** option.
- 3. Select the functions to reset, from Pan/Tilt, Iris/Prism, Color/CMY/Blade, Gobo/Gobo Rotate, Frost/Animation, or All.
- 4. Select **NO** (to cancel) or **YES** (to reset the selected functions).

Factory Reset

To reset the product to factory settings:

- 1. Go to the **Settings** main level.
- Select the Factory Settings option.
- 3. Select **NO** (to cancel) or **YES** (to reset the product configuration).

Test Mode

Auto Test

To have the Maverick Storm 4 Profile automatically test all functions one after the other:

- 1. Go to the **Test** main level.
- 2. Select the **Auto Test** option.

Manual Test

To manually test an individual function of the Maverick Storm 4 Profile:

- 1. Go to the **Test** main level.
- 2. Select the Manual Test option.
- Select a function to test, from Pan, Pan Fine, Tilt, Tilt Fine, P/T Speed, Dimmer, Dimmer Fine, Shutter, Virtual Shaking, Cyan, Magenta, Yellow, CTO, Color, Gobo, Gobo Rotate, Gobo Index, Gobo2, Gobo2 Rotate, Gobo2 Index, Animation, Animation Rotate, Blade1-1, Blade1-1 Fine, Blade1-2, Blade1-2 Fine, Blade2-1, Blade2-1 Fine, Blade2-2, Blade2-2 Fine, Blade3-1, Blade3-1 Fine, Blade3-2, Blade3-2 Fine, Blade4-1, Blade4-1 Fine, Blade4-2, Blade4-2 Fine, Blade Rotate, Blade. Rota Fine, Focus, Focus Fine, Focus Auto, Zoom, Zoom Fine, Prism, Prism Rotate, Prism2, Prism2 Rotate, Iris, Frost, Frost2, CMY Macro, CMY Macro Speed, or Special Function.
- 4. Increase or decrease the value of the selected function from 0-255 to test it.

System Information

The information section of the menu displays statistics and the current status of the product's various functions. To view this information:

- 1. Go to the **Information** main level.
- 2. Select from the **Fixture Information**, **Fan Information**, **Error Information**, or **Channel Information** options.
- 3. Use **<UP>** and **<DOWN>** to view all information.

Offset Mode

The Offset mode provides fine adjustments for the home position of every moving part in the optical path as well as the pan and tilt movements. To adjust these options and prevent borders showing or reduction of the light output:

- 1. From the main level screen, press and hold <MENU> until the passcode screen appears.
- 2. Enter the passcode: 0920 and press <ENTER>.
- 3. Select the "zero" position to adjust, from PAN, TILT, COLOR, GOBO, GOBO ROTATE, GOBO2, FOCUS-GOBO, FOCUS-GOBO2, ZOOM, PRISM, PRISM ROT, IRIS, FROST, FROST2, CYAN, MAGENTA, YELLOW, CTO, DIMMER, MAC4, MAC5, or MAC6.
- 4. Adjust the "zero" position for the selected function from **000–255**.

Web Server

The Maverick Storm 4 Profile Web Server can be accessed by any computer on the same network as the product. It allows network access to system information, settings such as control setup, manual testing of all functions, firmware updates, and the ability to change the Web Server password.

- 1. Connect the product to power, and set the **Control Mode** to **ArtNet** and the **IP Mode** to **Static**.
- 2. Connect the product to a Windows computer with a network cable.
- 3. On the computer, set the first value of the IP address of the new network to match the first value of the IP address of the product. The IP address of the product is displayed on the Home Screen.
- 4. Enter the IP address of the product into the URL bar of a web browser on the computer.
- 5. Enter both the User Name and Password as admin to log in.

Information

The Information page on the Web Server displays the current settings and the system information of the Maverick Storm 4 Profile.

Setup

The Setup page on the Web Server provides options for control, similar to the **Setup** menu on the product. Click **Save Settings** to send the new configuration to the product.

Manual Test

The Manual Test page on the Web Server allows all output functions of the product to be controlled through the browser. To set all functions back to default, click **Reset**.

Firmware Update

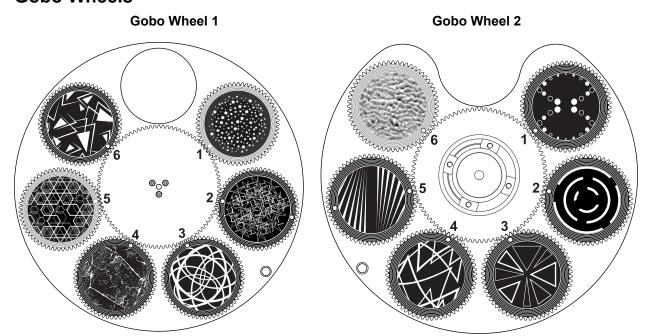

The Upgrade page on the Web Server allows the product to be updated with the latest firmware. Go to https://www.chauvetprofessional.com to download firmware updates.

Security

The Security page on the Web Server gives the option to change the password to the connected product's web server. Enter the old password (**admin**, by default) and the new password twice, then click **Save Settings** to change the password.

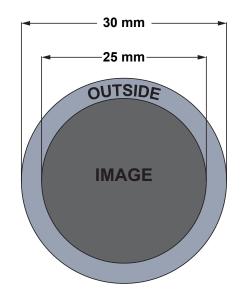

Gobo Wheels

Gobo Wheel	Gobo #	Description	Gobo Wheel	Gobo#	Description
1	1	Dots		1	Pipes & Poles
	2	Paperclip Party	· · · · · · · · · · · · · · · · · · ·	2	Cookie Cutter
	3	Orbital		3	This Way
	4	Dirty Dirt	4	Fast Moves	
	5	Box Cutter		5	Laser Rays
	6	Crazy Turns		6	Limbo

Gobo Dimensions

Gobo Replacement

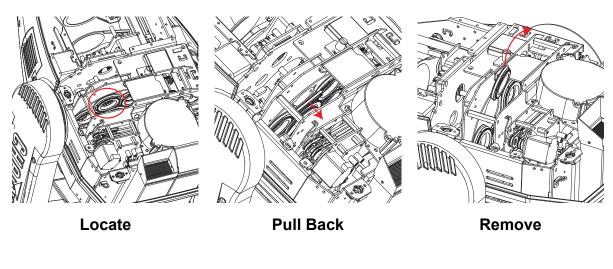

The gobos in both gobo wheels are removable from their gobo holder. This operation is quite simple, although it requires the technician to carefully follow the recommended procedure.

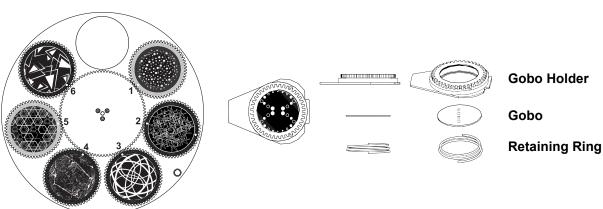

- Make sure to disconnect the product's power cord before replacing a gobo.
- Always replace a gobo with a gobo of the same dimensions.
- When inserting a glass gobo, always make sure that the shiny side of the gobo (glass base) faces the light source. This provides a layer of protection against the high temperature from the LED.

Procedure

- 1. Turn the product off and disconnect it from the power outlet.
- 2. Open the head cover by loosening the screws on the top cover.
- 3. Separate the gobo holder away from the gobo wheel by pushing it toward the front of the moving head (direction 1 in the diagram). Be careful not to push the gobo out of the gobo holder.
- 4. Extract the gobo holder by pulling it outward (direction 2 in the diagram).
- 5. On a flat surface, remove the expansion ring that holds the gobo in place and remove the gobo from the gobo holder.
- 6. Insert a new gobo and hold it in place with the expansion ring.
- 7. Slide the tip of the gobo holder under the pressure plate near the center of the gobo wheel.
- 8. Push the gobo holder inwards. DO NOT force the gobo holder into the gobo wheel slot. If correctly installed, the gobo holder should easily slide into the gobo wheel slot.

Diagram

5. Maintenance

Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean all lighting products at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

- 1. Unplug the product from power.
- 2. Wait until the product is at room temperature.
- Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
- 4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
- 5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
- 6. Softly drag any dirt or grime to the outside of the transparent surface.
- 7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Do not spin the cooling fans with compressed air. Damage may result.

Torque Measurements

To maintain the IP rating when reassembling the product, use the given torque measurements for each of the following screws and bolts:

Fixture Parts	Torque Rating (Kgf.cm)	Torque Rating (lgb.in)
Screws inside feet	15.3	13.3
Base screws around outside (not the feet)	53	46
Base screws in middle	89.7	77.8
Omega bracket holder	12.2	10.6
Front and rear base cover	25.5	22.1
Screws around power and data ports	3.5	3
Fuse	10.7	9.2
Center of yoke plate	25.5	22.1
Arm cover screws	25.5	22.1
Allen Key screws holding in front lens cover	12.2	10.6
Allen Key screws next to heat pipes on the back	25.5	22.1
Allen Key screws head covers	25.5	22.1

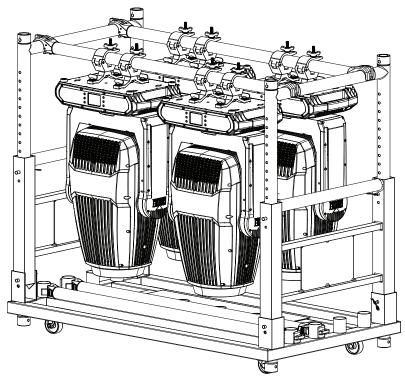

Vacuum Test Measurements

Use the IP Tester from Chauvet Professional to ensure the product has been reassembled correctly by following the information below:

Parameters	Values
Method	Positive
Test pressure	2.18 kPa
Test duration	60 seconds
PASS state leak pressure	<0.02 kPa

Transporting on Truss or Racks

When transporting fixtures in pre-rigged truss and transportation racks, mount fixtures in the vertical position with the lenses facing down and the pan and tilt locks engaged. This is to prevent undue stress on the tilt locks and limit the amount of off-axis bounce on internal components.
