Actionpanel
Full Color

The Action factor

The Actionpanel has been designed to be a hyper-technological and portable product, so you can use it wherever you may be. Weighing just 2 kg, with an ultra-resistant reinforced technopolymer shell, you no longer need to worry about carrying heavy and complicated to use solutions or with separate electronic parts on set. Super powerful flexibility, so you can focus on the fun part of your job: creating!

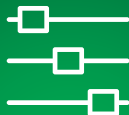

Intuitive settings

The digital display on the back of the Actionpanel Full Color allows you to clearly and easily visualize the light intensity you decide to set, the chosen color temperature and the DMX channels. All functions and settings are designed to make life simpler for professionals.

RGBWW

With this mode you can control red, green, blue and white independently.

HSI

HSI mode allows you to have full control over hue, saturation and intensity of all colors available.

Presets and Special Effects

The Actionpanel Full Color features an extensive collection of preset filters and special effects that you can quickly use on the set.

CCT Mode.

White

warm and cool
from 2800 K
to 10000 K

with the possibility to adjust green and magenta.
