

GeNetix 10Scene Contact

Product Code: CS300102

GeNetix 10Scene Contact is a DIN rail mountable 10-input dry contact trigger interface that integrates ChamSys control solutions, enabling MagicQ and QuickQ Playbacks and Executes to be triggered by open/close contacts, as well as triggering scenes on GeNetix GN5 and GN10 nodes.

Its two 10Scene Ports allow the interface to be daisy-chained with 10Scene Wall Plates and up to ten 10Scene Contacts per chain, all connected via the 10Scene Protocol that also powers the interface.

10Scene Contact provides a user-friendly and easily-integrated solution for adding external dry contact trigger remote control to MagicQ, QuickQ, and GeNetix systems.

Overview:

- 10 Open/Close Contact Trigger Inputs
