

onAir Panel 1 IP 30° Honeycomb

A light control grid accessory designed to manage unwanted light spill by uniformly reducing the beam spread for a more focused output.

Ideal for studio photography and filmmaking applications where precise, directional lighting is needed to isolate a subject and control highlights.

- Narrows the beam spread to a tight 30° for highly directional output.
- Controls unwanted light spill to isolate subjects and reduce lens flare.
- Designed for a secure and seamless fit with the onAir Panel 1 IP fixture.
- Ideal for broadcast, studio, and film applications requiring precise light control.
- Maintains a soft, even field of light while focusing the beam.
- Features a lightweight, durable build for fast-paced production environments.
