1- SYMBOLS

Graphic symbols used on this manual:

THIS SYMBOL INDICATES A HOT SURFACE

THIS SYMBOL INDICATES ELECTRIC SHOCK RISK

THIS SYMBOL INDICATES GENERAL RISK

t_a 40°C

THIS SYMBOL INDICATES THE MAXIMUM OPERATING AMBIENT TEMPERATURE

THIS SYMBOL MEANS “DO NOT STARE AT THE OPERATING LIGHT SOURCE”

THIS SYMBOL INDICATES PHOTOBIOLOGICAL SAFETY

THIS SYMBOL INDICATES THE EUROPEAN COMMUNITY DIRECTIVE 2012/19/EC ON WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE)

2- GENERAL WARNING

Read the instruction contained in this user manual carefully, as they give important information regarding safety during installation, use and maintenance.

The unit is not for residential use and must be installed by a qualified electrician or experienced person.

Always disconnect the device from the mains before maintenance.

The device must always be equipped with an efficient ground connection.

3- GENERAL WARRANTY CONDITIONS

The unit is guaranteed for 36 months from the date of purchase against manufacturing material defects.

4- TECHNICAL FEATURES

OVERVIEW

SCENA LED 200 is a high-power, compact, lightweight LED projector suitable for TV studios, theatres, museums, exhibitions, events.

SCENA LED 200 is the most up-to-date alternative to conventional lights, offering technical features that dramatically improve light quality and flexibility of use:

CRI>95, flicker-free projection, DMX-RDM remote control, noiseless operation, virtually zero maintenance costs, lower power consumption.

SCENA LED 200 is contained in a strong housing with folded edges, designed to withstand a continuous use.

DTS Product codes:

03.TS046.46.F SCENA LED 200 FR 3000K

03.TS048.46.F SCENA LED 200 FR 4000K

03.TS049.46.F SCENA LED 200 FR 5600K

LED Technology

Single high-power WHITE LED 3000K

CRI>95

15000 Lumens

Also available with 4000K and 5600K LEDs

Optical group

Ø 150 mm Fresnel lens

6,5° - 70° linear zoom

Control

DMX 512 / RDM

4 DMX channels (Default) or 1 DMX channel

4-digit 7-segment LED display + 4 soft keys

Power supply

Full-range 100-240Vac 50-60 Hz

Consumption: 200W Max

Connections

Power supply: PowerCON TRUE1 In&Out panel connectors

DMX: XLR 5 pins In&Out panel connectors

Operating ambient temperature

-10° / 40°

Weight

8,1 Kg

Certifications

2014/35/UE ; 2014/30/UE

IEC 62471 ; IEC 695-2-1

EN 60598-1 ; EN 62471 ; EN 61347-2-13

EN 60598-2-17 ; EN 55015 EMC ; EN 61347-1

DIMENSIONS

5- ACCESSORIES

As standard

- 1 x PowerCON TRUE1 female cable connector (DTS Code 0520P066)
- 1 x XLR 5 pins female cable connector (DTS Code 0508B147)
- 1 x XLR 5 pins male cable connector (DTS Code 0508B148)
- 1 x Filterframe black finishing (already installed on the projector) (DTS Code 02M093278.46)
- 1 x User's Manual

Optional (on request)

- Barndoor black finishing (DTS Code 03.TBD02)
- "C" Clamp G60 (Max. Load 50 Kg) (DTS Code 0521A004)
- Safety cable 3 mm x 60 cm, max capacity load 60 Kg (DTS Code 0521A010)

6- IMPORTANT SAFETY INFORMATION

6.1 Fire prevention:

Replace any blown or damaged fuses only with those of identical value: T 3.15A 250V.

6.2 Prevention from electric shock:

High voltage is present inside the unit. Unplug the unit prior to performing any operation which involves touching the inside of the unit.
This equipment must be grounded, do not connect to non-grounded supplies.
The use of a thermal magnetic circuit breaker is recommended for each SCENA LED 200 unit. Use only AC supplies 100-240V 50-60 Hz.
SCENA LED 200 should never be located in position exposed to rain or in areas of extreme humidity.
A good air ventilation is essential for proper equipment work.

6.3 Safety:

Risk Group 2 product according to EN 62471. Risk Group 2
CAUTION. Do not look directly into the light output. May be harmful to the eyes and skin.

Do not stare at the operating light source.

The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.

The unit is not for household use and must be installed by a qualified electrician or experienced person.

The external surface of the unit may exceed 60°C; never handle the unit until at least 5 minutes have elapsed since the unit was turned off.

Never install the unit in an enclosed area lacking sufficient air flow.

The ambient temperature should not exceed 40°C. t_a 40°C

6.4 Waste Electrical and Electronic equipment (WEEE) directive:

The unit, accessories and packaging should be sorted for environmental-friendly recycling.

For EC countries: according to the European Directive 2012/19/EC for Waste Electrical and Electronic Equipment and its implementation into national right, luminaires that are no longer usable must be collected separately and disposed of in an environmentally correct manner.

7- INSTALLATION

The unit is suitable for dry locations only.

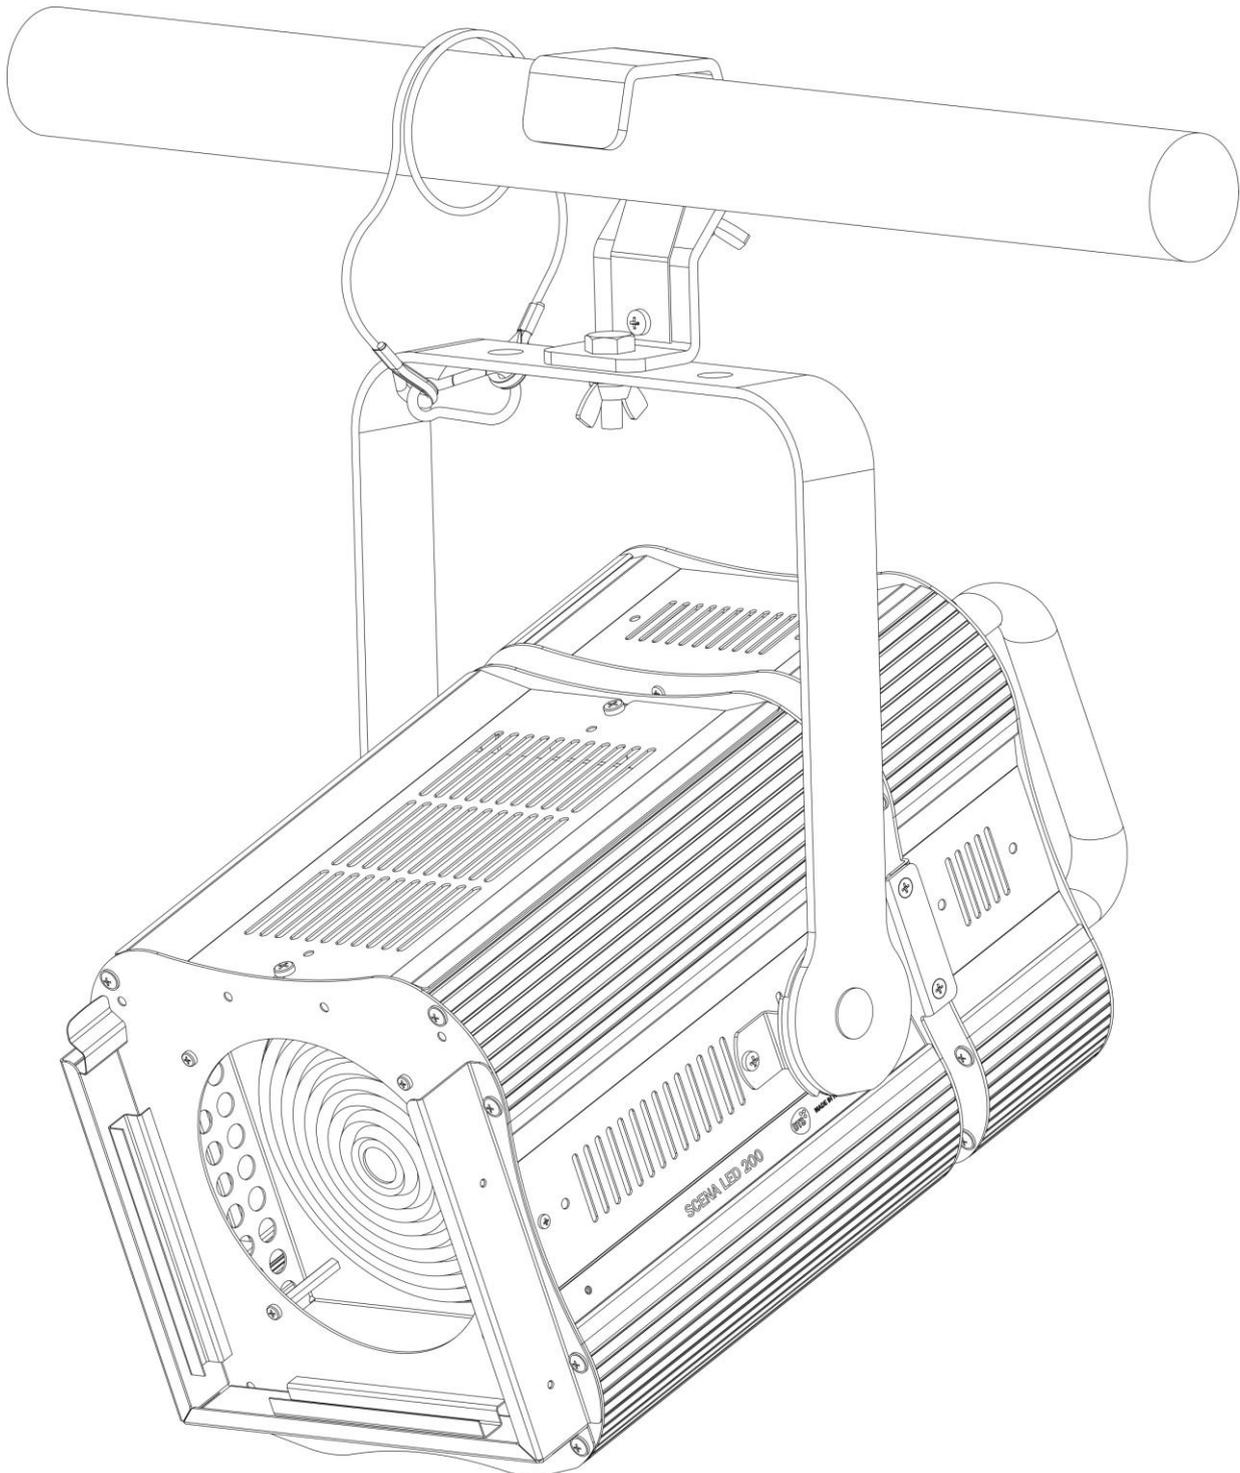

SCENA LED 200 can be installed on a truss or on the ceiling.

It is recommended the use of appropriate clamps to fix the unit to the mounting surface.

ATTENTION:

A safety cable (code 0521A010) must be securely fixed to the unit's mounting bracket and to the support structure of the projector as shown in the picture below.

Fixing clamps and safety cable are available on request.

8- INPUT / OUTPUT CONNECTIONS

9- DMX SIGNAL CONNECTION:

The unit operates using a digital DMX 512 signal.

Connection between the controller and the unit or between units must be carried out using a two pair screened \varnothing 0.5 mm.

Ensure that the conductors do not touch each other.

Do not connect the cable ground to the DMX connector chassis.

The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first unit to the DMX IN plug of the second one.

In this way, all the projectors are cascade connected.

If the display showing the DMX address flashes, then one of the following errors has occurred:

- DMX signal not present
- DMX reception problem

For Installations where long distance DMX cable connections are needed, we suggest to use a DMX terminator.

The DMX terminator is a male XLR 3-5 pins connector with a 120 ohm resistor Between pin 2 and 3.

The DMX terminator must be plugged into the last unit (DMX out panel connector) of the DMX line.

PLACE A 120 OHM RESISTOR BETWEEN PIN 2 AND 3 OF A MALE XLR CONNECTOR AND PLUG IT INTO THE DMX OUT PANEL CONNECTOR OF THE LAST UNIT CONNECTED TO THE DMX LINE

9.1 DMX addresses

SCENA LED 200 can be controlled with 4 DMX channels (Default) or 1 DMX channel. In order to use the unit in 4 DMX channels mode (Default), set the following addresses on the mixer:

Projector 1	A001	
Projector 2	A005	If you want to select the next projector, just add "4"
Projector 3	A009	
.....	A.....	
projector 6	A021	

9.2 Selecting the DMX address

- 1) Press the UP-DOWN key until you reach the required DMX address. The numbers on the display will start to flash (but the new DMX address hasn't yet been set).
- 2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now controlled by the new DMX address.

TIPS: if you keep pushed the UP or DOWN keys, the channels are calculated more quickly and you get a faster selection.

- 2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now controlled by the new DMX address.

10- RDM FUNCTIONS

By using a RDM controller it is possible to set DMX address, DMX mode and other parameters.

SCENA LED 200 accepts the following RDM commands:

DEVICE_INFO	To read the following parameters: <ul style="list-style-type: none"> • RDM protocol version • Fixture model ID • Fixture type • Software version ID • DMX channels • DMX mode • DMX address • Total sub-fixtures • Total sensors
IDENTIFY_DEVICE	LED ON at max power to identify the fixture
DMX_START_ADDRESS	To read / set the DMX address
SOFTWARE_VERSION_LABEL	Software version ID
SUPPORTED_PARAMETERS	List of all supported parameters
PARAMETER_DESCRIPTION	Description / details of Manufacturer Specific parameter as "NO DMX ACTION"
DMX_PERSONALITY	To set the DMX mode
DMX_PERSONALITY_DESCRIPTION	Description / details of the DMX mode
DEVICE_MODEL_DESCRIPTION	Description / details of the Fixture model
MANUFACTURER_LABEL	Producer ID
SENSOR_DEFINITION, SENSOR VALUE	Description / values of sensors
SENSORS	
1: Led Temperature	LED temperature
2: Micro Temperature	Micro controller temperature
3: Driver 1 Temperature	Output 1 of LED Driver board temperature
4: Driver 2 Temperature	Output 4 of LED Driver board temperature
RDM MANUFACTURER-SPECIFIC PIDs	
NO DMX ACTION	To set the desired fixture's behavior in case DMX signal is missing or not available. <ul style="list-style-type: none"> 1 = Black-out 2 = LED ON @ 60% 3 = LED ON @ 100% 4 = CUSTOM (Dimmer level selectable) NO DMX LEVEL 0 ÷ 255 (Default = 0) 5 = Keep last valid DMX signal (Default)

11- FIRMWARE UPDATING

To update the software version of the SCENA LED 200 you need:

- DTS RED BOX interface (DTS Code 03.LA.008).
- USB-DMX Driver for the DTS RED BOX interface.
- “DTS Firmware Upgrade Utility v.2.02” program installed on PC.
- Latest firmware release available for SCENA LED 200 unit.

Updating the software version.

Please follow the procedure below to perform the update:

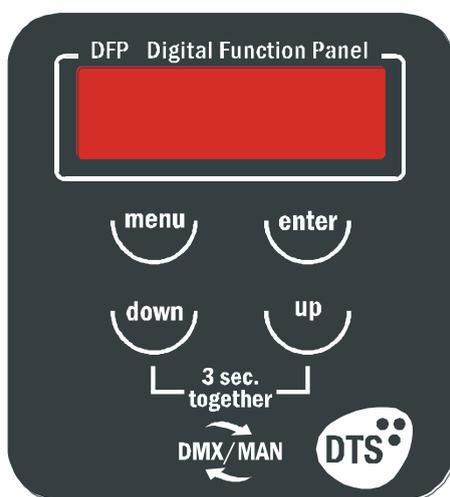

1. Install the DTS RED BOX USB-DMX driver on the PC you will use to update the unit software.
2. Connect the DTS RED BOX interface to a spare USB port on the PC (be sure that internal switch on DTS RED BOX is set to COM).
3. Connect the unit DMX input to the DTS RED BOX DMX output with a standard DMX cable and turn ON the unit.
4. Send the new software version into the unit by using “DTS Firmware upgrade Utility v.2.02” program. At the end of the procedure, the unit will reset.

12- DISPLAY FUNCTIONS

The SCENA LED 200 display panel shows all the available control menus.

Using these options, it is possible to change the fixture’s setting.

Changing the DTS settings can vary the functions of the unit so that it does not respond to the DMX 512 used to control it. Carefully follow the instructions below before carrying out any variations or selections.

MENU	<ul style="list-style-type: none"> • To access the control menus in the display panel. • To return to the previous level in the menu structure without making a change. • To exit the menus.
ENTER	<ul style="list-style-type: none"> • To select any required menu. • To confirm any changes.
UP / DOWN	<ul style="list-style-type: none"> • To navigate the menus structure. • To change any value.

Firmware release	1.00
------------------	------

MAIN MENU	LEVEL 1	LEVEL 2	LEVEL 3	FUNCTION	
DISP	Pos1	RR		Display normal orientation for floor mounting position (Default)	
		BB		Display inverted orientation for suspended mounting position	
	Stby	oFF		Display always ON (Default)	
		on		Display goes OFF after 10 seconds	
Mode	4 cH			Allows to select 4 DMX channels mode (Default)	
	1 cH			Allows to select 1 DMX channel mode	
LED	SMTH	oFF-20		Allows to select the value of the delay (in milliseconds) for Dimmer channel reaction to DMX or Program variation. Off = Instant response to DMX variation. 4 = 100 ms Smooth response to DMX variation (Default) 20 = 500 ms Smooth response to DMX variation.	
			comp	QuAd	Allows to select Quadratic current for linear light output (Default)
				LinE	Allows to select Linear current output
			Sync	610-5000	
	bst	on		Allows to increase the LED's current from 1470mA to 2100mA Default = ON	
		oFF			
	Auto	SurE			Automatic mode without DMX controller. In Auto mode the unit do generate DMX for slave units.
			dimm	0-255	Dimmer level selectable by user as on DMX channel 2 (DIMMER) Default = 255
SHut			0-255	Shutter level selectable by user as on DMX channel 1 (SHUTTER) Default = 0	
Esc				Esc from automatic mode menu	
SLAV	SurE	SLU		Slave mode. The unit is forced to DMX address 1 and 7 DMX channels mode receiving signal from the unit set in Auto mode.	
		Esc		Esc from slave mode	
FAn	Std			Allows to select the internal fans speed. Standard mode: High fans speed.	
	SIL			Silent mode: Low fans speed for a very low noise operation. Default = SIL	
ndNH	LdNH			No DMX action. Keep last valid DMX signal (Default)	
	60			LED ON @ 60%	
	100			LED ON @ 100%	
	cuSt	0-255		Dimmer level selectable for White Default = 255	
	oFF			Black-out	

MAIN MENU	LEVEL 1	LEVEL 2	LEVEL 3	FUNCTION
<i>dfSE</i>	<i>SurE</i>			To restore default settings
<i>tENP</i>	<i>LEd</i>	<i>025.0</i>		LED temperature monitoring
	<i>micr</i>	<i>025.0</i>		Micro controller temperature monitoring
	<i>drU1</i>	<i>025.0</i>		Output 1 of LED Driver board temperature monitoring
	<i>drU2</i>	<i>025.0</i>		Output 4 of LED Driver board temperature monitoring
<i>tINE</i>	<i>LEd</i>			Shows the total unit life time and LED life time
	<i>unit</i>			
<i>SoFt</i>	<i>v.1.00</i>			Software version

13- MANUAL MODE

Manual mode can be activated by pressing at the same time 'UP' and 'DOWN' keys on unit display for 3 seconds (A001).

In Manual mode it is possible to select the DIMMER level (range 0-255) as on DMX channel 2 and SHUTTER level (range 0-255) as on DMX channel 1.

When Manual mode is active, unit switch OFF/ON cycle will maintain Manual Mode selection.

In Manual mode the DMX signal is ignored.

14- ERROR MESSAGES

ERROR SHOWED ON DISPLAY	APPEARS WHEN
<i>LEd SEnSor Error</i>	LED thermal sensor damaged (open or in short circuit). Unit immediately goes in black-out.
<i>LEd ouErTENPERAturE</i>	LED temperature detected over 100°C. Unit immediately goes in black-out.
<i>micr SEnSor Error</i>	Micro controller thermal sensor damaged (open or in short circuit). Unit immediately goes in black-out.
<i>micr ouErTENPERAturE</i>	Micro controller temperature detected over 100°C. Unit immediately goes in black-out.
<i>drU1 SEnSor Error</i>	Thermal sensor on output 1 of LED Driver board damaged (open or in short circuit). Unit immediately goes in black-out.
<i>drU1 ouErTENPERAturE</i>	Temperature detected over 100°C on output 1 of LED Driver board. Unit immediately goes in black-out.
<i>drU2 SEnSor Error</i>	Thermal sensor on output 4 of LED Driver board damaged (open or in short circuit). Unit immediately goes in black-out.
<i>drU2 ouErTENPERAturE</i>	Temperature detected over 100°C on output 4 of LED Driver board. Unit immediately goes in black-out.
