

onAir Panel 1 IP Medium Diffusion Filter

The onAir Medium Diffusion filter is an interchangeable accessory for compatible onAir Panel lights, offering nuanced diffusion to optimize light output and beam quality. This standard filter is perfectly suited for broadcast, film, and studio applications requiring a balanced and softened light source for general-purpose use.

- Designed for a seamless and secure fit on onAir Panel 1 IP fixtures.
- Delivers a medium diffusion effect to soften hard edges and homogenize the beam.
- Reduces specular highlights and harsh shadows for a flattering on-camera look.
- Allows for quick, simple swaps to adapt lighting to changing scene requirements.
- Maintains high color fidelity and optimal light transmission during use.
- Modifies the native beam angle to create a wider, more even field of light.
