# 1. Before You Begin

## What Is Included

- COLORado 1QS
- Seetronic Powerkon IP65 power cord
- Gel frame
- Omega bracket
- Quick Reference Guide

## Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

## Text Conventions

Convention	Meaning
<b>1–512</b>	A range of values
<b>50/60</b>	A set of values of which only one can be chosen
<b>Settings</b>	A menu option not to be modified
<b>&lt;ENTER&gt;</b>	A key to be pressed on the product’s control panel

## Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.

**Any reference to data or power connections in this manual assumes the use of Seetronic IP rated cables.**

**The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.**

### Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

**This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.**

**All applicable local codes and regulations apply to proper installation of this product.**

### Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Do not touch the product's housing when operating because it may be very hot.

### Mounting and Rigging

- Do not submerge this product (IP65). Temporary outdoor operation is fine.
- When using this product in an outdoor environment, use IP65 (or higher) rated power and data cables. Secure unused power and data ports with attached IP65 covers.
- CAUTION: When transferring product from extreme temperature environments, (e.g., cold truck to warm, humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Not for permanent outdoor installation in locations with extreme environmental conditions. This includes, but is not limited to:
  - Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
  - Locations where the normal high or low temperatures exceed the temperature ranges in this manual.
  - Locations that are prone to flooding or being buried in snow.
  - Areas where the product will be subjected to extreme radiation or caustic substances.
- Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- Make sure there are no flammable materials close to the product when operating.
- When hanging this product, always secure to a fastening device using a safety cable.

### Power and Wiring

- Make sure the power cord is not crimped or damaged.
- Always make sure you are connecting this product to the proper voltage in accordance with the specifications in this manual or on the product's specification label.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- Never connect this product to a dimmer pack or rheostat.
- Make sure to replace the fuse with another of the same type and rating.
- Never disconnect this product by pulling or tugging on the power cable.

### Operation

- Do not operate this product if there is damage on the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate the product at higher temperatures.
- The minimum startup temperature is -4°F (-20°C). Do not start the product at lower temperatures.
- The minimum ambient temperature is -22°F (-30°C). Do not operate the product at lower temperatures.
- In the event of a serious operation problem, stop using this product immediately!

**If your Chauvet product requires service, contact Chauvet Technical Support.**

### Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

## 2. Introduction

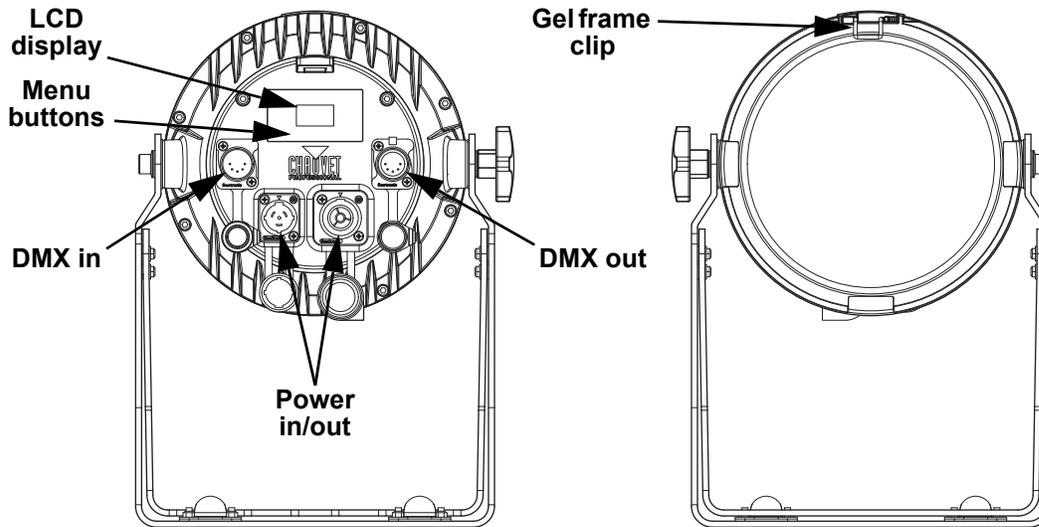

### Description

The COLORado 1QS is an indoor/outdoor wash light with a homogenized output from a single, high-power RGBW LED source. A 17° beam angle offers versatile control and 16-bit-dimming facilitates smooth fades. An IP65 housing makes it ideal for touring, rental, and production markets. Outdoor-rated power and data connectors allow for easy connections without propriety cabling. It also includes an omega bracket with ¼ turn adapters for fast and easy rigging and is compatible with all 7.5" accessories.

### Features

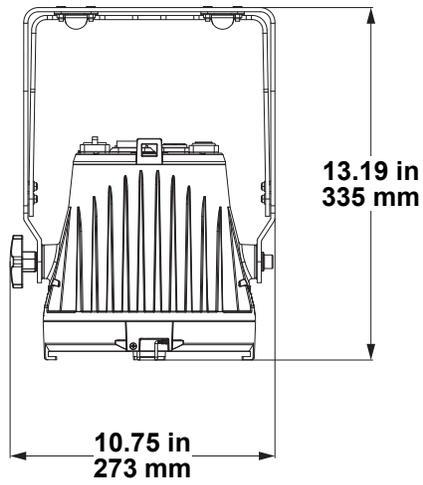

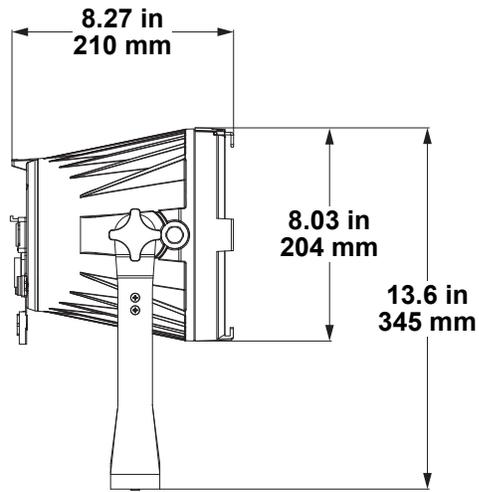

- Operating modes:
  - HSIC (7-channel): dimmer, 16-bit hue, saturation, color temperature, strobe, dimmer speed
  - SSP (7-channel): dimmer, RGBW, strobe, dimmer speed
  - TOUR (10-channel): dimmer, RGBW, color macros, strobe, auto programs and speed, dimmer speed
  - TR16 (15-channel): 16-bit dimmer, 16-bit RGBW, color macros, strobe, auto programs and speed, dimmer speed
  - STD.Y (15-channel): 16-bit dimmer, 16-bit RGBW, color macros, strobe, auto programs and speed, dimmer speed
- RGBW LED wash for touring, rental, and production, indoors or out
- All environment operation with IP rated power and DMX connections
- Flat, even field of light from a single source
- RDM and variable PWM (Pulse Width Modulation) for setup ease
- Accepts standard 7.5" beam shaping accessories
- 16-bit dimming resolution for smooth fades
- Double-bracket yoke doubles as floor stand

### Product Overview

## Introduction

## Product Dimensions

### 3. Setup

#### AC Power

The COLORado 1QS has an auto-ranging power supply and it can work with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the current value listed on the label affixed to the product's back panel, or refer to the product's specifications chart. The listed current rating indicates the product's average current draw under normal conditions.

- **Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

**Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.**

#### AC Plug

The COLORado 1QS comes with a power input cord terminated with a Seetronic Powerkon A connector on one end and an Edison plug on the other end (U.S. market). If the power input cord that came with your product has no plug, or if you need to change the plug, use the table below to wire the new plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

#### Power Linking

The product supports power linking. You can power link up to 18 products at 100 V, up to 22 products at 120 V, up to 35 products at 208 V, up to 38 products at 230 V, or up to 40 products at 240 V.

This product comes with a power input cord. Power linking cables are available from Chauvet for purchase.

#### Remote Device Management (RDM)

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer as not all DMX controllers have this capability. The COLORado 1QS supports RDM protocol that allows feedback to make changes to menu map options.

## Setup

### Mounting

Before mounting the product, read and follow the safety recommendations indicated in the [Safety Notes](#). For our CHAUVET Professional line of mounting clamps, go to <http://trusst.com/products/>.

### Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

### Rigging

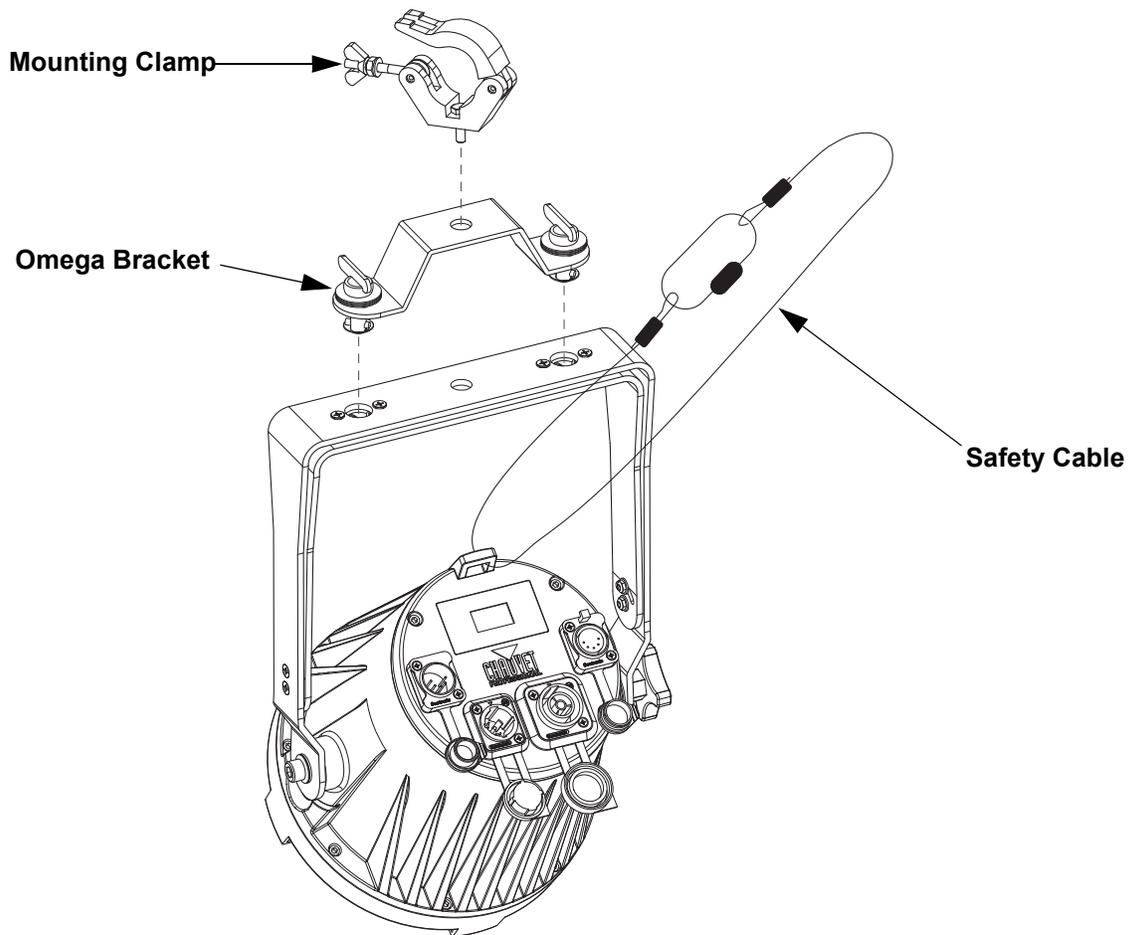

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which you are mounting the product can support the product's weight. See the [Technical Specifications](#) for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.

### Procedure

The COLORado 1QS comes with a bracket to which you can attach a mounting clamp directly. Mounting clamps are sold separately. Make sure the clamps are capable of supporting the weight of this product. Use at least two mounting points per product. For the CHAUVET Professional line of mounting clamps, go to <http://www.trusst.com/products>.

## 4. Operation

### Control Panel Description

Button	Function
<MENU>	Exits from the current menu or function
<UP>	Enables the currently displayed menu or sets the currently selected value in to the current function
<DOWN>	Navigates upward through the menu list or increases the numeric value when in a function
<ENTER>	Navigates downward through the menu list or decreases the numeric value when in a function

### Control Options

Set the COLORado 1QS starting address in the 001–506 DMX range. This enables control of up to 34 products in the 15-channel **STD.Y** personality.

### Programming

Refer to the Menu Map to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To go to the desired main level, press <MENU> repeatedly until the option shows on the display. Press <ENTER> to select. This will take you to the first programming level for that option.
- To select an option or value within the current programming level, press <UP> or <DOWN> until the option shows on the display. Press <ENTER> to select. In this case, if there is another programming level, you will see that first option, or you will see the selected value.
- Press <MENU> repeatedly to exit to the previous main level.

### Menu Map

Refer to the COLORado 1QS product page on [www.chauvetprofessional.com](http://www.chauvetprofessional.com) for the latest menu map.

Main Level	Programming Levels			Description

### Configuration (DMX)

Use control configurations to operate the product with a DMX controller.

#### Control Personalities

To set the control personality:

1. Go to the **PERSONALITY** main level.
2. Select the desired personality, from **HSIC**, **SSP**, **TOUR**, **TR16**, or **STD.Y**.

- See the [Starting Address](#) section for the highest starting address you can select for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

### Starting Address

Each product will respond to a unique starting address from the controller. All products with the same starting address will respond in unison. To set the starting address:

1. Go to the **ADDRESS** main level.
2. Select the starting address (**1–506**).
  - The highest recommended starting address for **HSIC** is **506**.
  - The highest recommended starting address for **SSP** is **506**.
  - The highest recommended starting address for **TOUR** is **503**.
  - The highest recommended starting address for **TR16** is **498**.
  - The highest recommended starting address for **STD.Y** is **498**.

## Configuration (Standalone)

### Static Color

To set the COLORado 1QS to a preset static color:

1. Go to the **STATIC** main level.
2. Select from the **RED**, **GREEN**, **BLUE**, **WHITE**, and **STROBE** options.
3. Increase or decrease the value from **000–255** (**RED**, **GREEN**, **BLUE**, or **WHITE**), or **0–25** (**STROBE**).

### Automatic Program

To run a preset or custom automatic program:

1. Go to the **AUTO PROGRAM** main level.
2. Select from **AUTO1–10** (preset) or **PROGRAM1–10** (custom).
3. Increase or decrease the **SPEED** from **000–255**.

### Custom Program

To customize an automatic program:

1. Go to the **EDIT** main level.
2. Select from **PROGRAM 01–10**.
3. Select from **SCENE 01–30**.
4. Select from **RED**, **GREEN**, **BLUE**, **WHITE**, **STROBE**, **TIME**, or **FADE**.
5. Increase or decrease the selected value from **000–255**.

## Configuration (Settings)

### Run Mode

To select the run mode:

1. Go to the **RUN MODE** main level.
2. Select from **DMX** (master mode), or **SLAVE** (slave mode).

### Upload Custom Programs

To upload the custom programs from one COLORado 1QS product to another:

1. Go to the **SETTING** main level.
2. Select the **UPLOAD** option.
3. Enter the passcode (**UP**), **<DOWN>**, **<UP>**, **<DOWN>**, **<ENTER>**).
4. Select **SEND** to upload.

### Factory Reset

To reset the product to factory default settings:

1. Go to the **SETTING** main level.
2. Select the **RESET** option.
3. Enter the passcode (**UP**), **<DOWN>**, **<UP>**, **<DOWN>**, **<ENTER>**).

### Dimmer Speed

To select the dimmer speed:

1. Go to the **SETTING** main level.
2. Select the **DIMMER** option.
3. Select from **OFF** (linear dimmer) or **DIM1-4** (fast to slow).

### DMX Error

To select what happens when a DMX signal is lost:

1. Go to the **SETTING** main level.
2. Select the **DMX ERROR** option.
3. Select from **SAVE** (continues last command) or **BLACK** (blacks out).

### Pulse Width Modulation

To set the PWM frequency:

1. Go to the **SETTING** main level.
2. Select the **PWM** option.
3. Select from **600Hz**, **1200Hz**, **2000Hz**, **2400Hz**, **6000Hz**, **18000Hz**, or **25000Hz**.
4. If **XY Offset** is set to **SHOW**, select from **X FINE** or **Y FINE**.
5. Increase or decrease the offset from **-200**–**+200**.

### Correlated Color Temperature

To set the CCT mode at full power:

1. Go to the **SETTING** main level.
2. Select the **FULL POWER CCT** option.
3. Select from **WARM WHITE**, **NEUTRAL WHITE**, **COOL WHITE**, or **NORMAL** (manual control).

### XY Offset

To set whether the X FINE and Y FINE options are available under PWM:

1. Go to the **SETTING** main level.
2. Select the **XY OFFSET** option.
3. Select from **HIDE** (not available) or **SHOW** (available).

### Passcode

To enable or disable the passcode lock:

1. Go to the **KEY** main level.
2. Select from **ON** (display locked) or **OFF** (display unlocked).

### Color Calibration

To select a preset white balance:

1. Go to the **CALIB.C** main level.
2. Enter the passcode (**UP**), **<DOWN>**, **<UP>**, **<DOWN>**, **<ENTER>**).
3. Select from **WHITE-01-13**.
4. Select from **X FINE** or **Y FINE**.
5. Increase or decrease the offset from **-200**–**+200**.

### Product Information

To view the product information:

1. Go to the **INFO** main level.
2. Select from **VERSION** or **RDM**.

# 5. Maintenance

## Product Maintenance

Dust build-up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life and/or mechanical wear. To maintain optimum performance and minimize wear, clean your lighting products at least twice a month. However, be aware that usage and environmental conditions could be contributing factors to increase the cleaning frequency.

To clean the product, follow the instructions below:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surface/vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint free cotton cloth or a lens cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

**Always dry the transparent surfaces carefully after cleaning them.**

## Returns

---

### Returns

Send the product prepaid, in the original box, and with the original packing and accessories. Chauvet will not issue call tags.

Call Chauvet and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause(s) for the return.

To submit a service request online, go to [www.chauvetprofessional.com/service-request](http://www.chauvetprofessional.com/service-request).

Clearly label the package with an RMA number. Chauvet will refuse any product returned without an RMA number.

**Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.**

Before sending the product, clearly write the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

**Chauvet reserves the right to use its own discretion to repair or replace returned product(s).**
