

17725

Floor stand for spot lights

Product variant

17725-000-55 - black

352 mm
steel
with threaded bolt M10
black
0.7 kg

The robust cross base guarantees sturdiness for floor spotlights. The stand is collapsible and is ready for transport in a snap. Additional tools are not required. The end caps are made of rubber and protect the floor from scratches. Mounting the spotlight with the bracket is fast and easy by attaching the handy star knob nut to the M10 threaded bolt.
