## 1- SYMBOLS

Graphic symbols used on this manual:

**THIS SYMBOL INDICATES A HOT SURFACE**  
Never handle the unit until at least 10 minutes have elapsed since the projector was turned off.

$t_c$  80°C

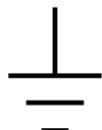

**THIS SYMBOL INDICATES TEMPERATURE OF THE EXTERNAL SURFACE**

The maximum temperature that can be reached on the external surface of the fitting, in a thermally steady state, is 80°C (176°F).

**THIS SYMBOL INDICATES THE ELECTRIC SHOCK RISK**

High voltage is present inside the unit. Unplug the unit prior to performing any function which involves touching the inside of the moving head.

**THIS SYMBOL INDICATES PROTECTION AGAINST ELECTRICAL SHOCK**

Connection must be made to a power supply system fitted with efficient earthing (Class I appliance).

**THIS SYMBOL INDICATES GENERAL RISK**

**THIS SYMBOL MEANS YOU CAN PLACE THE UNIT ON NORMALLY FLAMMABLE SURFACES**

Suitable for mounting on normally flammable materials surfaces greater than 200°C with some combustion time lag.

Risk Group 2

**THIS SYMBOL MEANS PHOTOBIOLOGICAL SAFETY**

Caution: Possibly hazardous optical radiation emitted from this product. Do not stare at operating light source. May be harmful to the eyes.

LED Ø 0,5 m

**THIS SYMBOL INDICATES THE MINIMUM DISTANCE FROM ILLUMINATED OBJECTS**

LiFePO4

**LONG-LIFE AUTO-CHARGING BUFFER BATTERY**

The projector contains a rechargeable lead-acid or lithium iron tetrephosphate battery. To preserve the environment, please dispose the battery at the end of its life according to the regulation in force.

## **2- GENERAL WARNING**

Read the instruction contained in this user manual carefully, as they give important information regarding safety during installation, use and maintenance.

The device is not for domestic use and must be installed by a qualified electrician or experienced person.

Always disconnect the device from the mains before maintenance.

The device must always be equipped with an efficient ground connection.

## **3- GENERAL WARRANTY CONDITIONS**

The unit is guaranteed for 36 months from the date of purchase against manufacturing material defects.

## **4- TECHNICAL FEATURES**

### **Overview**

**WONDER S** introduces a revolutionary fixture architecture: an exclusive optical system consisting of two concentric zones, each featuring a different type of lenses. This new technology achieves an unprecedeted result: the brightest most uniform wall wash ever seen.

In traditional wash lights, in fact, when the beam is widened to illuminate a larger area, a darker spot is visible in the center. The exclusive optics of the **WONDER S**, however lets you balance the brightness of the entire beam with that of its center, resulting in unparalleled evenly diffused luminosity.

You can also obtain stunning multicolor projections: **WONDER S** LED board consists of four independent zones: a central one, and a ring divided into three distinct sections. Each of these four areas has individual control of luminosity, colors and effects: it's like having four LED fixtures in one.

The unit is also available as **WONDER D**, offering an exclusive double concentric optical system featuring different lenses and linear zoom ranges (central: 3.5° - 52° zoom; ring: 8° - 52° zoom).

This revolutionary configuration results in an unprecedented evenly diffused luminosity, size and color.

**WONDER D** can create amazing concentric multi-color beams and effects in the air, guaranteed to astonish any audience. Also, **WONDER D** comes equipped with the 'FPR' system (D.T.S. patent), which allows limitless pan rotation, in either direction, never having to reverse motion.

### **WONDER S FC**

**(D.T.S. Product Code: 03.LDR014.F)**

- Electronic ballast 90-260Vac 50-60 Hz • Black finish

### **WONDER D FPR FC**

**(D.T.S. Product Code: 03.LDR013.FFP)**

- Electronic ballast 90-260Vac 50-60 Hz • FPR (Free Pan Rotation) • Black finish

## **4- TECHNICAL FEATURES**

### **LED Technology**

49 FULL COLOUR LEDs (RGBW)

### **Optical group**

WONDER S:

7 x 3.5° lenses; 42 x 8° lenses

3.5° - 52° long excursion high-efficiency linear motorized zoom

22.000 Lux / 5 m

WONDER D:

2 concentric independent high efficiency optical groups

Optical group 1 (7 lenses): 3.5° - 52° long excursion linear motorized zoom

Optical group 2 (42 lenses): 8°- 52° long excursion linear motorized zoom

22.000 Lux / 5 m

### **Color generation**

4 discrete LED areas; each area is independently controllable (luminosity, colors, effects) 16 million colors each

Wide palette of pure uniform whites with variable linear color temperature (2700K – 8000K)

### **Interface / Control / Programming**

LCD graphic display + 4 soft-keys (control / management of the main parameters)

Long-life auto-charging buffer battery

RDM

ARTNET ready

Wireless ready

Updatable internal operating system

Li-Fe display backup battery (WONDER D)

### **DMX channels**

34 ch (Default) or 38 ch

### **Pan & Tilt**

WONDER S:

Pan 540°: 2.5 sec.; Tilt 270°: 1.5 sec

WONDER D:

'FPR' system (D.T.S. patent)

Pan: limitless rotation, in both directions; 360° rotation in 1.56 sec.; Tilt 270°: 1.5 sec.

Tri-phase stepper motor technology for ultra-fast silent movements

16-bit resolution

Selectable speed ranges

Pan / Tilt lock

### **Power supply**

Electronic full-range 90-260Vac 50-60 Hz

Power consumption: 850W

### **Connection**

DMX: 4 XLR connectors (3-pole In and Out; 5-pole In and Out) by Neutrik

Power supply: POWERCON IN and OUT (re-launch) connectors by Neutrik

## **Operating ambient temperature**

-10° / 40°

## **Weight**

22 Kg

## **International certifications**

Certification CE; LED Class: Class 2 LED product

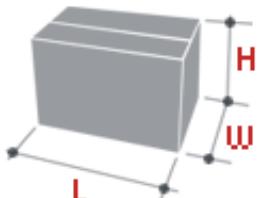

## **DIMENSIONS**

Packaging Dimensions (LxWxH)

610 x 410 x 695 mm

Weight: 27 Kg

## **5- ACCESSORIES**

### **As standard**

- \* 1 x POWERCON male cable connector (Code 0520P014)
- \* 1 x XLR 5 Pins male cable connector (Code 0508B066)
- \* 1 x XLR 5 Pins female cable connector (Code 0508B065)
- \* 2 x Omega clamp with "Fast Lock" connection 1/4 turn (Code 02K00549)
- \* User's manual

### **Optional (on request)**

- "C" Clamp G100 black / professional (max. load 200Kg) (Code 0521A015)
- Aliscaf Clamp (max. capacity load 100Kg) (Code 0521A008)
- Safety wire (3mm x 60 cm), ring spring catch, max. capacity load 60Kg (Code 0521A010)

## 6- IMPORTANT SAFETY INFORMATION

### 6.1 Fire prevention:

-It is permissible to place the unit on normally flammable surfaces.  
Suitable for mounting on normally flammable materials surfaces greater than 200°C with some combustion time lag.

-Minimum distance from the closest illuminable surface: 0,5 m. LED (0,5 m)

-Replace any blown or damaged fuses only with those of identical value (10AT). Refer to the wiring diagram if there is any doubt.

-Connect the projector to mains power via a thermal magnetic circuit breaker. It is, moreover, recommended to protect the supply lines of the projectors from indirect contact and/or shorting to earth by using appropriately sized residual current devices.

### 6.2 Prevention of electric shock:

-High voltage is present inside the unit.

Unplug the unit prior to performing any function which involves touching the inside of the moving head.

-The level of technology inherent in the WONDER requires the assistance of specialised personnel for all servicing.

Please refer to an authorised D.T.S. service centre.

-Connection must be made to a power supply system fitted with efficient earthing (Class I appliance).

-A good earth connection is essential for proper functioning of the projector.

-Never connect the unit without proper earth connection.

-The fixture should be located in places with a good air ventilation.

### 6.3 Safety:

-The projector should always be installed with bolts, clamps and other tools that are capable of supporting the weight of the unit.

-Always use a second safety cable to sustain the weight of the unit in case of the failure of the main fixing point.

-The maximum temperature that can be reached on the external surface of the fitting, in a thermally steady state, is 80°C (176°F).  $t_c$  80°C

Never handle the unit until at least 10 minutes have elapsed since the projector was turned off.

-Never install the fixture in an enclosed area lacking sufficient air flow.

The ambient temperature should not exceed 40°C.

-Caution: Possibly hazardous optical radiation emitted from this product.

Do not stare at operating light source. May be harmful to the eyes.

Risk Group 2

### 6.4 Level of protection against the penetration of solid and liquid objects:

-The projector is classified as an ordinary appliance and its protection level against the penetration of solid and liquid objects is IP20.

### 6.5 Long-life auto-charging buffer battery:

-The projector contains a rechargeable lead-acid or lithium iron tetrephosphate battery. To preserve the environment, please dispose the battery at the end of its life according to the regulation in force.

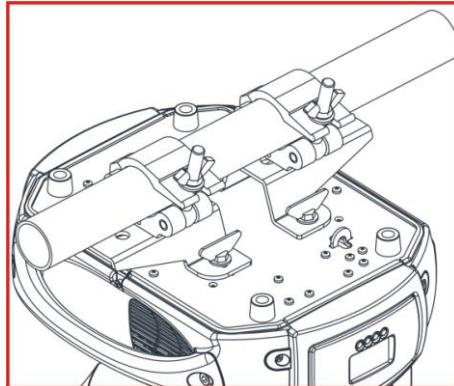

LiFePO4

## 7- VOLTAGE AND FREQUENCY

The WONDER with electronic ballast can operate at 90-260Vac 50-60 Hz.

## 8- INSTALLATION

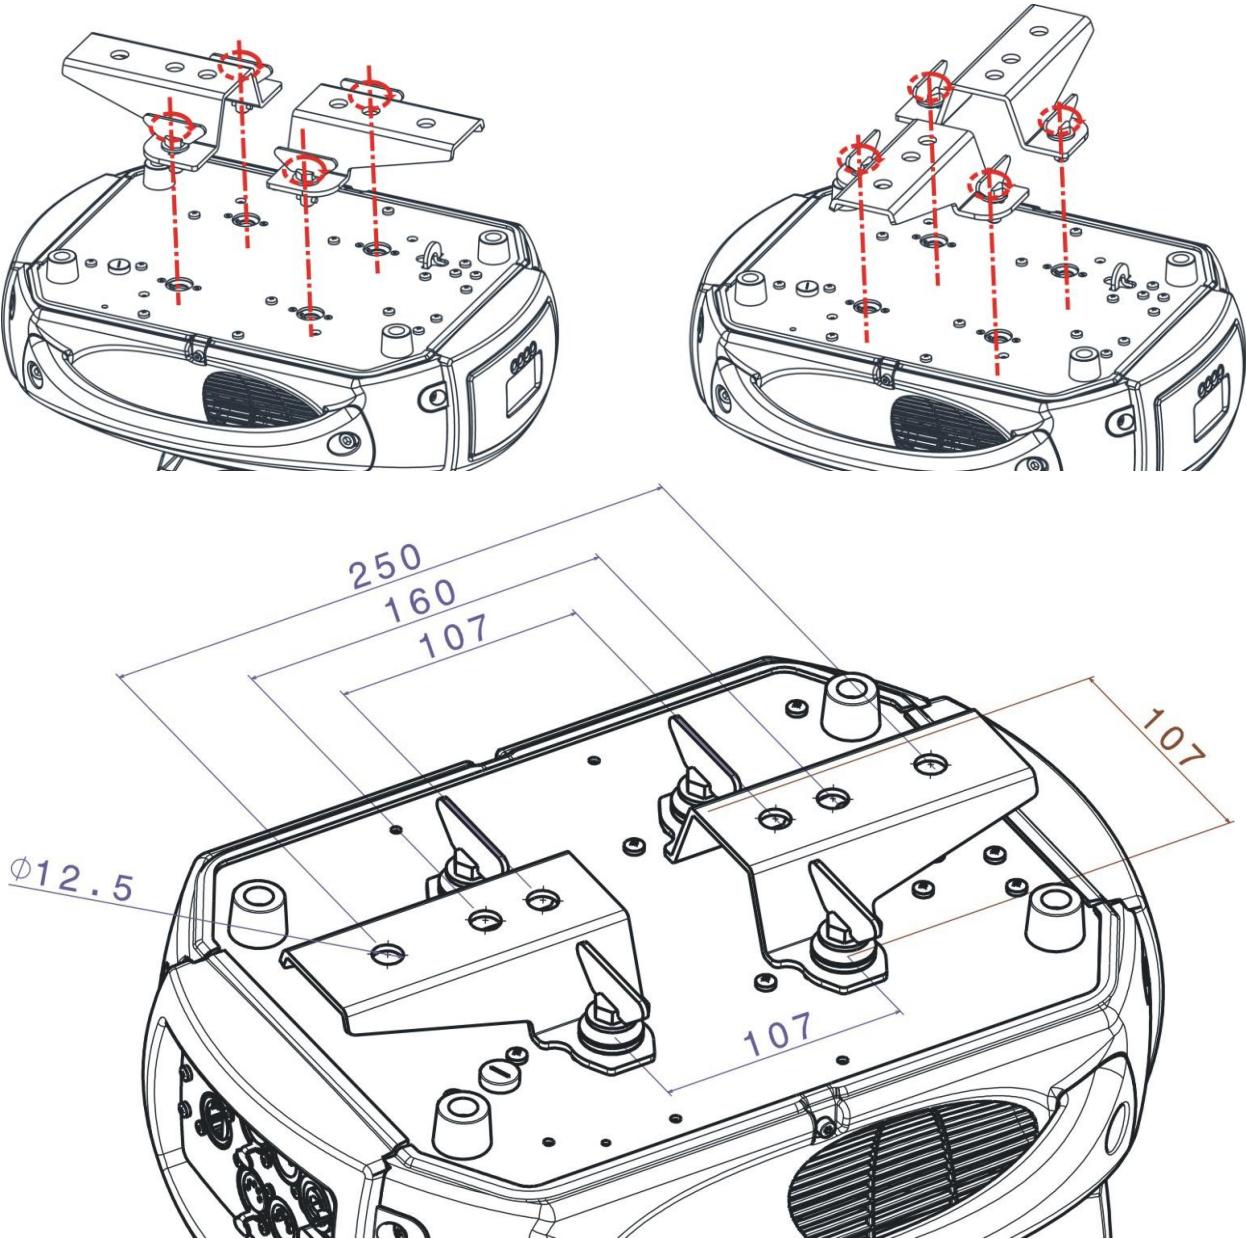

WONDER may be either floor or ceiling mounted. For floor mounting installations, the WONDER is supplied with four rubber mounting feet on the base. For ceiling mounted installations, we recommend the use of appropriate clamps to fix the unit to the mounting surface.

The supporting structure from which the unit is hung should be capable of bearing the weight of the unit, as should any clamps used to hang it.

The structure should also be sufficiently rigid so as not to move or shake whilst the WONDER is moving.

Four 1/4 turn Fast Locks connections placed in the base of the unit allow to hang the WONDER by using the two omega clamps (provided in the box) in conjunction with fixing clamps for truss (fixing clamps are not included into the unit box).

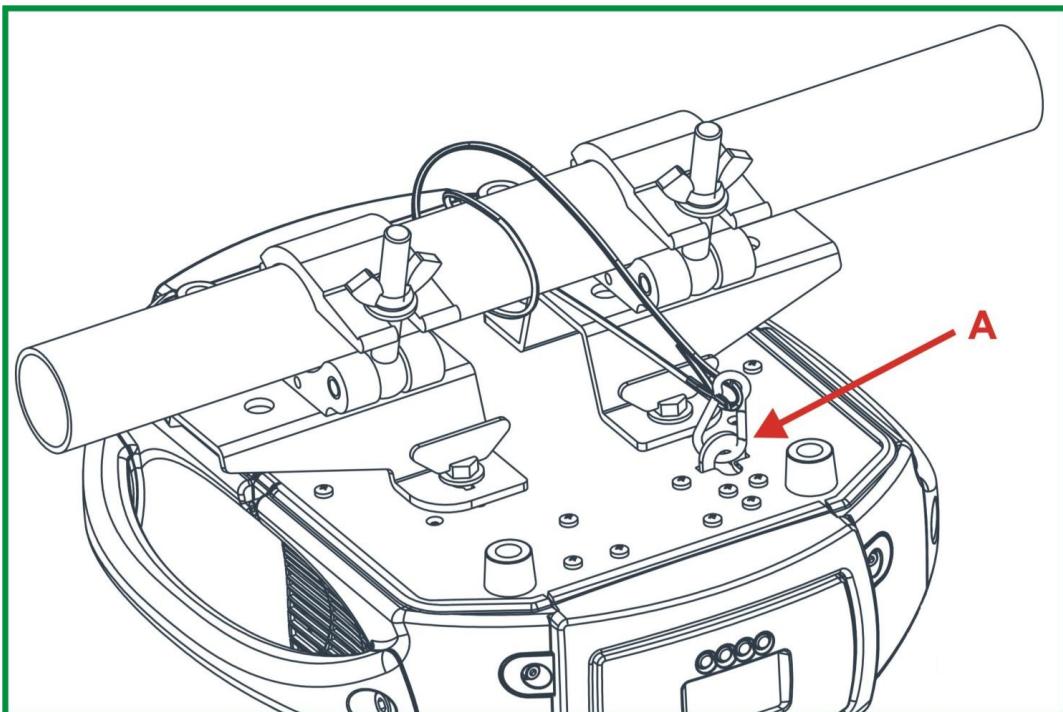

**8.1- Safety cable**

We recommend the use of a safety cable or chain connected to the WONDER and to the suspension truss in order to avoid the fixture accidentally falling should the main fixing point fail.

Make sure that the iron cable or chain can bear the weight of the entire unit.

You may attach the safety chain/cord to the attachment point (A) located on the base of the fixture, as shown in the picture below.

**8.2 Protection against liquids**

The projector contains electric and electronic components which should under no circumstances come into contact with oil, water or any other liquid.

The proper unit functioning would be compromised should this occur.

### 8.3- Movement

Unlimited Pan rotation; Tilt 270° (1,5 sec.) .

Do not place any obstructions in the path of the projector's movement.

#### **WARNING**

Do not place any object in the path of the projector's movement

**Free Pan Rotation ('FPR')**

### 8.4- Risk of fire

Each fixture produces heat and must be installed in a well-ventilated place.

It is permissible to place the unit on normally flammable surfaces. Suitable for mounting on normally flammable materials surfaces greater than 200°C with some combustion time lag.

Minimum distance from the closest illuminable surface: 0,5 m. LED ⌈ 0,5 m ⌋

### 8.5- Forced ventilation

You will note, on inspection, that the unit features various air inlets and cooling fans located on both the base and head of the fixture.

These should, under no circumstances, be blocked or obstructed whilst the projector is in operation. Doing so could cause the fixture to seriously overheat thereby compromising its proper operation.

### 8.6- Ambient temperature

The projector should never be installed in places that lack a constant air flow. The ambient temperature should NOT exceed 40°C.

## 9- MAINS CONNECTION

WONDER with electronic ballast operates at 90-260V 50-60 Hz.

Prior to connecting the unit to your mains supply, ensure that the model in your possession correctly matches the mains supply available.

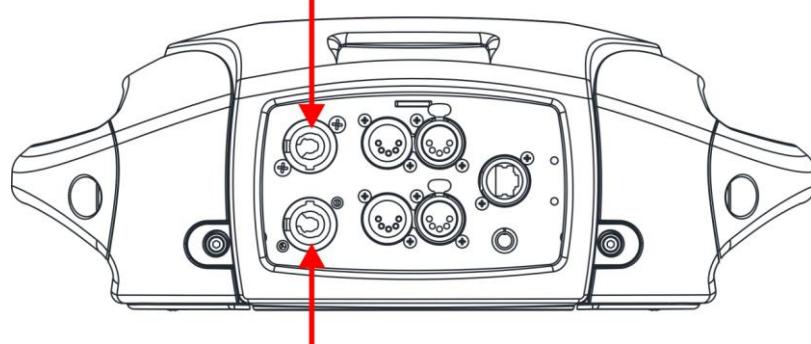

For connection purposes, ensure that your plug is capable of supporting 4 amps at 230 VOLT, or 10 amps at 90 VOLT each unit connected.

Strict adherence to regulatory norms is strongly recommended.

### **MAINS AC OUTPUT 90-260V 50/60 Hz (16A Max)**

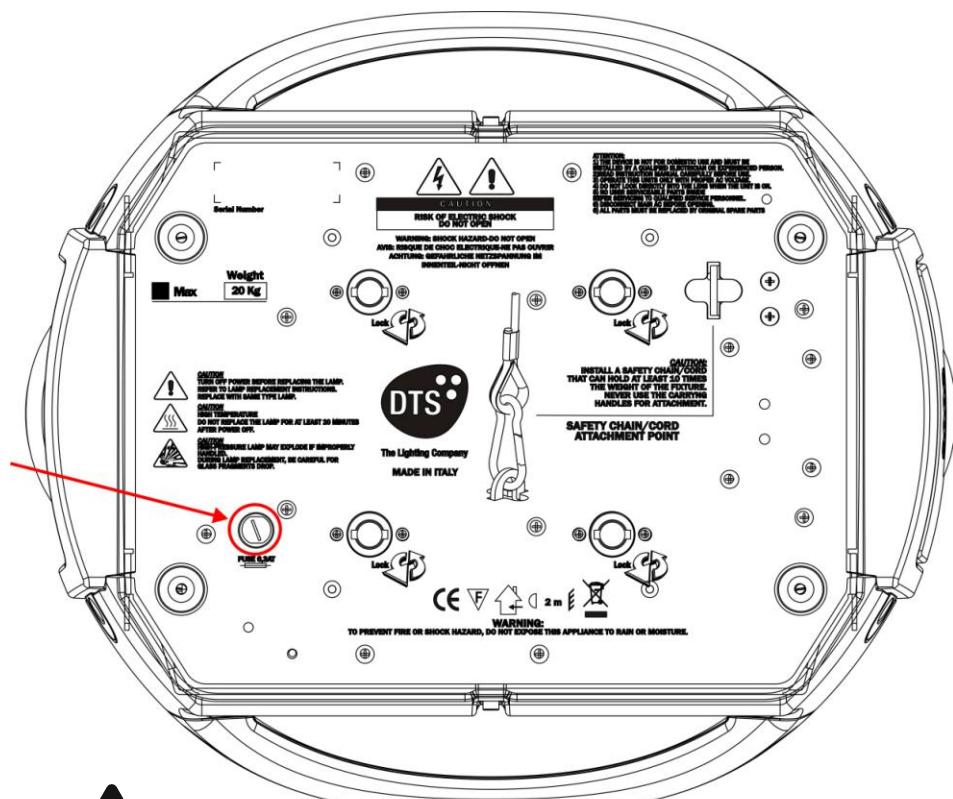

Max 4 WONDER Units @ 230V

Max 2 WONDER Units @ 120V

**MAINS AC INPUT 90-260V 50/60 Hz**

**FUSE 10A T**

### 9.1- Protection

The use of a thermal magnetic circuit breaker is recommended for each WONDER. It is, moreover, recommended to protect the supply lines of the projectors by using Appropriately sized residual current devices.

Connection must be made to a power supply system fitted with efficient earthing (Class I appliance). A good earth connection is essential for the correct operation

## 10- DMX SIGNAL CONNECTION

The unit operates using the digital DMX 512 signal.

Connection between the mixer and the projector or between projectors must be carried out using a two pair screened ø 0.5 mm cable and a XLR 5 or 3 pins connector.

Ensure that the conductors do not touch each other.

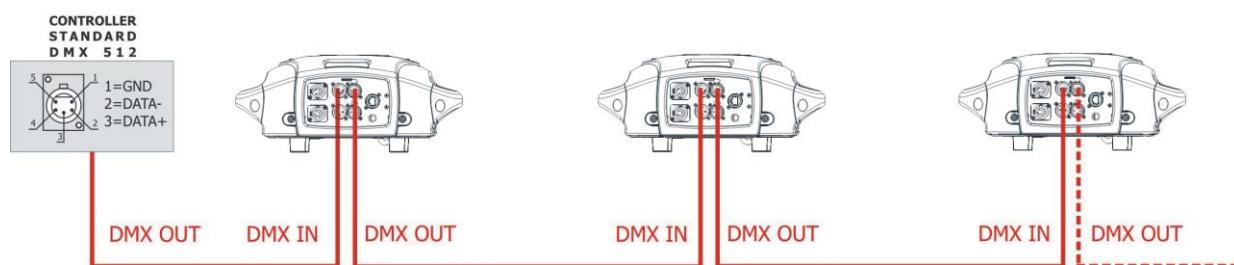

Do not connect the cable ground to the XLR chassy.

The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first projector to the DMX IN plug of the second one.

This way, all the projectors are cascade connected.

NB. If the display showing the DMX address flashes, then one of the following errors has occurred:

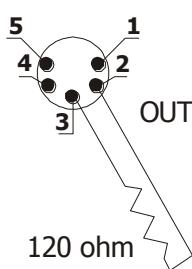

- DMX signal not present
- DMX address not valid
- DMX reception problem

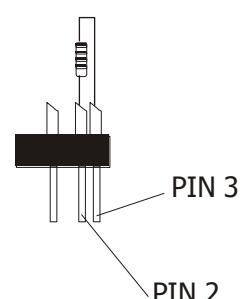

For installations where long distance DMX cable connections are needed, we suggest to use a DMX terminator.

The DMX terminator is a male XLR 3-5 pins connector with a 120 ohm resistor between pin 2 and 3.

The DMX terminator must be plugged into the last unit (DMX out panel connector) of the DMX line.

PLACE A 120 OHM RESISTOR BETWEEN PIN 2 AND 3 OF A MALE XRL CONNECTOR AND PLUG IT INTO THE DMX OUT PANEL CONNECTOR OF THE LAST UNIT CONNECTED TO THE DMX LINE

## **10.1-DMX Addresses**

WONDER S / WONDER D can be used in 2 different DMX modes: 34 DMX control channels (Default) or 38 DMX control channels.

Here below is described the DMX channels addressing for the controller when WONDER is set to 34 and 38 DMX control channels:

### **34 channels mode (Default)**

Projector 1	A001	
Projector 2	A035	If you want to select the next projector, just add “34”
Projector 3	A069	
.....	A....	
projector 6	A171	

### **38 channels mode**

Projector 1	A001	
Projector 2	A039	If you want to select the next projector, just add “38”
Projector 3	A077	
.....	A....	
projector 6	A191	

## **10.2-Selecting the DMX address**

- 1) Press the UP-DOWN key until you reach the required DMX channel. The numbers on the display will start to flash (but the new DMX address hasn't yet been set).
- 2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now setted to the new DMX address.

### **TRICKS:**

If you keep pushed the UP or DOWN keys, the channels are calculated more quickly and you get a faster selection.

## **11- FIRMWARE UPDATING**

To update the software version of the WONDER S / WONDER D you need:

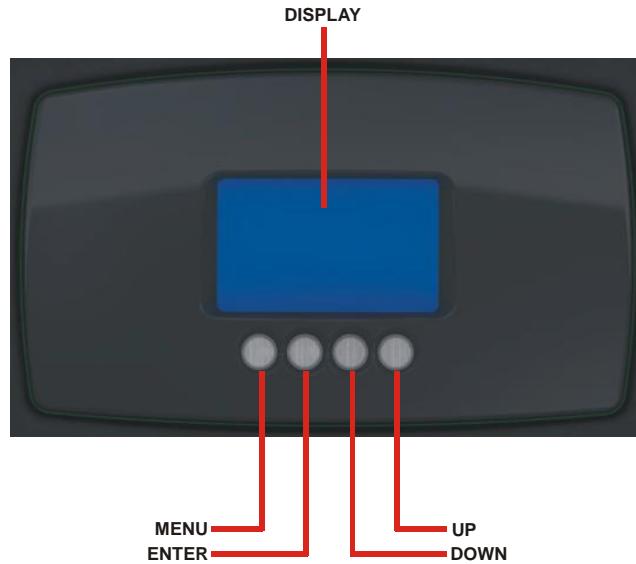

- “D.T.S. Firmware Upgrade Utility” program installed on the PC
- D.T.S. RED BOX interface (D.T.S. Code: 03.LA.008)
- USB-DMX Driver for the D.T.S. RED BOX interface.
- Latest firmware release available for WONDER S / WONDER D unit

### **Updating the software version.**

Please follow the procedure below to perform the update:

1. Install the D.T.S. RED BOX USB-DMX driver on the PC you will use to update the unit software.
2. Connect the D.T.S. RED BOX interface to the PC by using a USB cable.
3. Connect the D.T.S. RED BOX interface to the fixture by using a DMX cable.
4. Send the new software version into the unit by using “D.T.S Firmware Upgrade Utility” program.

## 12- DISPLAY FUNCTIONS

### DISPLAY FUNCTIONS

The WONDER S / WONDER D display panel shows all the available functions . Using these functions, it is possible to change some of the parameters and add some functions. Changing the D.T.S. setting can vary the functions of the unit so that it does not respond to the DMX 512 used to control it. Carefully follow the instructions below before carrying out any variations or selections.

NOTE: the symbol shows which key has to be pushed to obtain the desired function.

#### Software Version: 10-11-11

Pan Direction

Up-Down  
ENTER

##### PAN DIRECTION

## 12- DISPLAY FUNCTIONS

Display

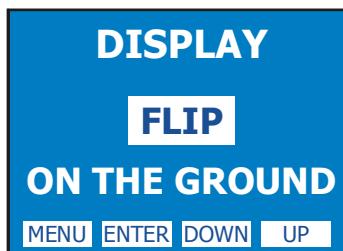

DISPLAY FLIP / STAND BY / CONTRAST

Display Flip:  
Reverses display's reading depending on the mounting position (on the ground or suspended).

Display Standby:  
To turn off the display (after 5 seconds) or leave it always on.

Display Contrast:  
Display contrast regulation (1-40)

Display Flip  
ON THE GROUND (Default)  
SUSPENDED

Display Standby  
OFF = Display Standby disabled (Default)  
ON = Display goes OFF after 5 seconds

Display Contrast  
1-40 (Default = 25)

DMX Mode

DMX MODE  
To select DMX mode:  
34 channels (Default) or 38 channels

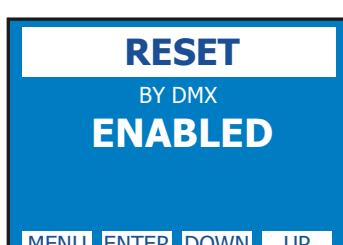

DMX Mode  
34 channels (Default)  
38 channels

Reset

RESET  
Reset via DMX ENABLED / DISABLED and unit motors reset

ENABLED = Reset via DMX enabled (Default)  
DISABLED = Reset via DMX disabled  
NOW = Unit motors reset

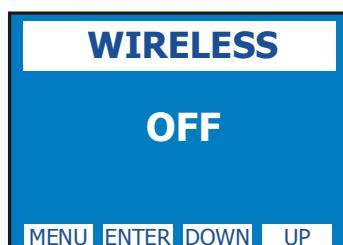

Wireless

WIRELESS  
Wireless DMX enabled / disabled.

(Wireless module on request)

ON = Enabled  
OFF = Disabled (Default)  
UNLINK = Log out

(Wireless module on request)

## 12- DISPLAY FUNCTIONS

LED

**SMOOTH:** This menu allows to select the value of the delay (in milliseconds) for RGBW and Dimmer channels reaction to DMX or program variation.  
4 = 25 ms delay (fast response)  
20 = 250 ms delay (slow response)

**GAMMA CORRECTION**

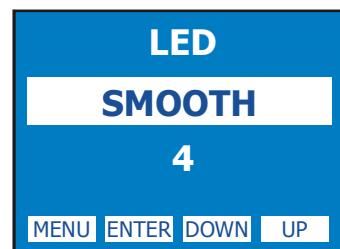

This menu allows to select between Linear current output or Quadratic current output for LEDs.

**OUTPUT FREQUENCY**

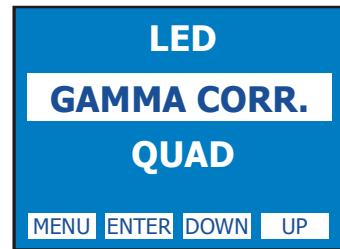

This menu allows to adjust the PWM frequency value (Hz) in order to reduce flickering in the process of your camera recordings.

**BOOST**

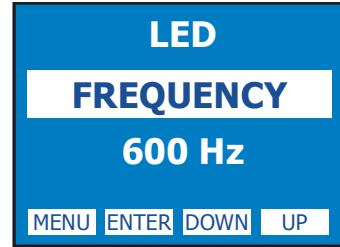

This menu allows to increase the LEDs current from 800mA to 1000mA.

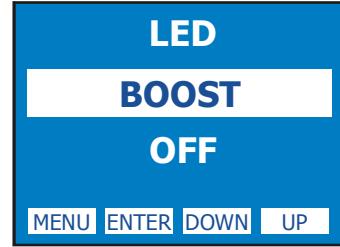

**SMOOTH VALUE**  
Range = 0 – 20  
Default = 4

**GAMMA CORRECTION**  
LINE = Linear current output  
QUAD = Quadratic light output (Default)

**OUTPUT FREQUENCY**  
Range: 600 Hz – 10 KHz  
Default = 600 Hz

**BOOST**  
OFF = 800mA (Default)  
ON = 1000mA

Live-Studio setting

**LIVE-TOUR mode** = High fans speed: the LEDs always work at maximum power (Default)

**STUDIO mode** = Low fans speed for a very low noise operation

## 13- PERIODIC CLEANING

### 13.1- Front lenses screen glass

The dust can reduce the luminous output substantially.

Regularly clean the front lenses screen glass using a soft cotton cloth, dampened with a specialist lens cleaning solution.

### 13.2- Fans and air passages

The fans and air passages must be cleaned approximately every 6 weeks.

This periodic cleaning will depend of course, on the conditions in which the projector is operating.

Suitable instruments for performing this type of maintenance are a brush and a common vacuum cleaner or an air compressor.

If necessary, clean the fans and air passages more frequently.

## 14- PERIODIC CONTROLS

### Mechanical parts

Periodically check all mechanical parts, replacing them if necessary.

### Electrical components

Check all electrical components for correct earthing and proper connection of all connectors, refastening if necessary.

### Fuse replacement

Locate the fuse, which protects the electronics, in the base of the WONDER. Using a multimeter, test the condition of the fuse, replacing it with one of equivalent type (10AT) if necessary.
