

onAir Panel 2 IP Light Diffusion Filter

The onAir Light Diffusion filter is an interchangeable panel for compatible onAir lights that produces a more intense beam with stronger, more defined shadows.

This filter is ideal for applications in photography and videography where dramatic, high-contrast lighting with sharp shadows is desired to shape a subject or scene.

- Produces a harder-edged beam with increased intensity versus the standard filter.
- Ideal for creating key lighting with sharp contrast in broadcast or film applications.
- Functions as an optional, interchangeable filter for onAir Panel 2 IP units.
- Offers precise optical control for shaping subjects and sculpting scenes.
- Reduces diffusion to intensify output and sharpen beam edges.
- Purpose-built to seamlessly integrate with the onAir Panel 2 IP fixture.

SPECIFICATIONS

Construction / Physical

Dimensions: 26.02 x 12.44 x 0.28 in (661 x 316 x 7 mm)
